Volume 120

Key factors affecting water permeate velocity in reverse osmosis based on concentration polarization model I.S. Al-Mutaz, F.M. Alsubaie, I. Wazeer (Saudi Arabia)	1
Effect of microbubbles on membrane fouling due to protein in water treatment processes T. Watabe, T. Takahashi, K. Matsuyama, H. Matsuyama (Japan)	9
Evaluation on membrane fouling by hydrophobic and hydrophilic substances through permeation coefficient and concentration polarization factor in SWRO processes Jong-Woo Nam, Geon-Youb Kim, KiTae Park, Hyung-Soo Kim, Ji-Hoon Kim (Korea)	16
Evaluation on cleaning efficiency and membrane fouling by permeation coefficient and concentration polarization factor in pilot-scale SWRO processes Jong-Woo Nam, Geon-Youb Kim, Minjin Kim, Poo Reum Kim, Hyung-Soo Kim, Ji-Hoon Kim (Korea)	23
One-step catechol-based biomimetic strategy to fabricate organic-inorganic hybrid coatings on PTFE flat membrane for the improvement of hydrophilicity and fouling resistance Yunying Luo, Chengcai Li, Jieqi Wang, Sikuai Xue, Feng Wang, Hailin Zhu, Yuhai Guo (China)	31
Prediction of salt rejection by nanofiltration and reverse osmosis membranes using Spiegler-Kedem model and an optimisation procedure N. Zouhri, M. Igouzal, M. Larif, M. Hafsi, M. Taky, A. Elmidaoui (Morocco)	41
Influence of modified clay on the structure and performance of polysulfone composite membrane S.B. Teli, A. Benamor, M.S. Nasser (Qatar), M. Ba-Abbad, A.W. Mohammad (Malaysia)	51
An evaluation on cleaning efficiency of forward osmotic backwashing based on organic matter analysis in SWRO processes Jong-Woo Nam, Geon-Youb Kim, Jun-Young Park, Hyung-Soo Kim, Ji-Hoon Kim (Korea)	65
High water flux poly(acrylonitrile-co-methyl acrylate) membranes fabricated via thermally induced phase separation Linli Tan, Na Han, Longfei Zhang, Zhenyu Cui, Wei Li, Xingxiang Zhang, Jun Cai (China)	73
Removal of micropollutants and nutrients in household wastewater using organic and inorganic sorbents W. Zhang, K. Blum, M. Gros, L. Ahrens, H. Jernstedt, K. Wiberg, P.L. Andersson, B. Björlenius, G. Renman (Sweden)	88
Operational parameters effects on photocatalytic reactors of wastewater pollutant: a review P. Roushenas, Zhi Chao Ong, Z. Ismail, Z. Majidnia, Bee Chin Ang, M. Asadsangabifard, Chiu Chuen Onn, Jun Hui Tam (Malaysia)	109
Wastewater recovery by ultrafiltration and electro dialysis in the integrated citric acid-methane production process Xian-Feng Su, Jian Xu, Chen Liu, Hong-Jian Zhang, Zhong-Gui Mao (China)	119
Effect of low-strength magnetic fields on the oil removal performance of oil-degrading microorganisms Zhijun Ren, Xiaodong Leng, Zhongxiang Zhang, Haining Feng (China)	133
Investigation of electrocoagulation reactor design effect on the value of total dissolved solids via the treatment of simulated wastewater F.Y. AlJaberi (Iraq)	141
Treatment of domestic wastewater in step-feeding anoxic/oxic activated sludge-biofilm system at low temperature: Performance, removal characteristics, and community Fan Wang, Jun Li, Dejun Bian, Wei Bian, Li Zhang, Zebing Nie (China)	150
Biosorption of nickel from model solutions and electroplating industrial effluent using cyanobacterium <i>Arthrospira platensis</i> I. Zinicovscaia (Russia, Romania, Moldova), N. Yushin, S. Gundorina (Russia), Š. Demčák (Slovak Republic), M. Frontasyeva, I. Kamanina (Russia)	158
Sludge characteristics and performance of a membrane bioreactor for treating oily wastewater from a car wash service station Khac-Uan Do (Vietnam), Ji-Hoon Kim (Korea), Xuan-Quang Chu (Vietnam)	166

Development and optimization of chemometric assisted micro-cloud point extraction for preconcentration and separation of Eriochrome black T in water and wastewater samples A. Rakhshani Aval, M. Rahmani, E. Ghasemi (Iran)	173
Textile wastewater treatment by using cement kiln dust and biochar filters K.M. Esawy (Egypt)	180
Temperature-phased anaerobic co-digestion of sewage sludge and microalgae for enhanced biomethane production C.B. Bondad (Philippines), Jinyeong Shin (Korea), M.D.G. de Luna (Philippines), Young Mo Kim (Korea)	185
Statistical approach to developing screening models for pipe failure events in water network systems Bumjo Kim, Seo Jin Ki, Dong Jin Jeon, Joon Ha Kim (Korea)	190
Scenario study of the effect of different land use to a sub-basin in Yeongsan River basin using SWAT model M.E. Jolejole (Philippines), Bum Jo Kim, Dong Jin Jeon (Korea), M. Cayetano (Philippines), Joon Ha Kim (Korea)	198
Simulation and optimization of multiple points hedging policies for operation of Cameron Highland hydropower reservoir system, Malaysia A. Tayebian (Iran), T.A. Mohammad (Iraq), A.H. Ghazali, M.J. Megat Mohd Noor (Malaysia)	205
Tailored activated carbons prepared by phosphoric activation of apricot, date and loquat stones and their mixtures; relation between the pore size and the composition in biopolymer K. Larbi (Algeria, France), N. Benderdouche (Algeria), L. Reinert, J.M. Leveque, S. Delpeux (France), M. Benadjemia, B. Bestani (Algeria), L. Duclaux (France)	217
Chloride removal from industrial cooling water using a two-stage ultra-high lime with aluminum process Chunwoo Lee (USA), Dong Suk Han, A. Abdel-Wahab (Qatar), Jaebum Kim, Sung Hyuk Park (Korea)	228
Lignin isolation during recycling of waste wood in an urban locale Hyunsu Lee, Jinyeong Shin, Youngjune Park, Young Mo Kim (Korea)	234
Application of cane bagasse adsorption on nitrate removal from groundwater sources: adsorption isotherm and reaction kinetics D. Khademi, M.J. Mohammadi, R. Shokri, A. Takdastan, M. Mohammadi, R. Momenzadeh, A.R. Yari (Iran)	241
Synthesis and characterization of graphene oxide nanosheets decorated with Fe ₃ O ₄ nanoparticles: an efficient adsorbent for nickel(II) removal Xue Li, Kang Zhao, Caiyin You, Wensheng Linghu, Mei Yu (China), A. Alsaedi (Saudi Arabia), T. Hayat (Saudi Arabia, Pakistan), Hui Pan, Jie Luo (China)	248
Kinetics and equilibrium study for the adsorption of lysine on activated carbon derived from coconut shell Jinbei Yang, Shuicui Han (China)	261
Electrochemical behaviors and determination of rifampicin on graphene nanoplatelets modified glassy carbon electrode in sulfuric acid solution Jiao Zou, Le-Le Huang, Xin-Yu Jiang, Fei-Peng Jiao, Jin-Gang Yu (China)	272
Degradation of disrupter regulator dietilphtalate by (AOP)-UV-C/H ₂ O ₂ using response surface methodology M.C. de Almeida, T.F. de Oliveira, F.P. de Sá (Brazil)	282
Reductive degradation of high concentration nitrobenzene using nanoscale zero-valent iron particles immobilized on polyaniline S. Dehghan, A. Azari, R. Rezaei Kalantary (Iran)	289
Catalytic oxidation of polymers used in oilfield by metal-1,2-benzenediol complex Ying Tang, Haomiao Ren, Pengwei Yang, Hong Li, Jie Zhang, Chengtun Qu (China)	304
Influence of infiltration rates during profenofos pesticide removal by attached and entrapped bacterial cells K. Sonsuphab, T. Ratpukdi, S. Siripattanukul-Ratpukdi (Thailand)	311
Microaerophilic decolorization of a textile dye C.I. Reactive Red 31 by indigenous bacterial consortium: Process optimization and enzymatic mechanism R. Khan, M.H. Fulekar (India)	323
The performance of a novel sleeve-type CW-MFC-CW system for acid orange 7 (AO7) removal and electricity generation with leaves as a carbon source on winter days Lianfang Zhao, Dandan Zhu, Shaowen Tan, Li He, Zongren Lu, Jibao Ciren (China)	335
The mechanisms of reactive blue photodegradation by iron(III)/H ₂ O ₂ /HA systems Xiaoxia Ou, Fengjie Zhang, Yajun Huang, Xuejun Zou, Yubo Cui (China)	343
Usage of fruit-fibers of <i>Luffa cylindrica</i> for the sorptive removal of Direct Blue 15 dye from water A. Rauf, T. Mahmud, M. Ashraf, R. Rehman, S. Basharat (Pakistan)	350
Author Index	361
