Volume 127

Selected papers presented at the 15th International Conference on Environmental Science and Technology (CEST2017) 31 August–2 September 2017, Rhodes, Greece

Preface

L. Borea (Italy), I.K. Kalavrouziotis (Greece).....	1
Changes of turbidity during the oxidation of dihydroxylated benzenes by Fenton reagent and effect on dissolved oxygen N. Villota, J.M. Lomas, L.M. Camarero (Spain)	2
Environmental effects of WWTP discharge on the quality of the receptor river D. Panepinto, M.C. Zanetti, E. Lorenzi, M. Deceglia (Italy)	8
Leachate treatment using a novel sustainable fixed bed-based method S. Morris, G. Garcia-Cabellos, D. Ryan, D. Enright, A.-M. Enright (Ireland)	18
Strategies for sustainable wastewater treatment based on energy recovery and emerging compounds control: a mini-review Guangxue Wu (China), Kai He (Japan), Jia Miao, Qidong Yin, Yingfen Zhao (China)	26
Kinetic modelling of colour changes in aqueous solutions of phenol oxidized by sono-Fenton technology N. Villota, J.M. Lomas, A. Santaolalla, L.M. Camarero (Spain)	32
Coal combustion ash sorbents for Cd and Zn capture in single-compound and binary systems M. Balsamo, F. Di Natale, A. Erto, F. Montagnaro (Italy)	41
Bilge water treatment and desalination based on HDH-technology: an experimental investigation of a demonstration plant M. Preißinger (Austria, Germany)	50
Technical-economic evaluation on chromium recovery from tannery wastewater streams by means of membrane processes M. Stoller, O. Sacco, G. Vilaridi (Italy), J.M. Ochando Pulido (Spain), L. Di Palma (Italy)	57
Use of Ca- and Mg-type layered double hydroxide adsorbent to reduce phosphate concentration in secondary effluent of domestic wastewater treatment plant S.M. Ashekuzzaman, Jia-Qian Jiang (UK)	64
Reduction of nitrogen content in landfill leachate using microalgae A.A. Casazza, M. Rovatti (Italy)	71
Removal of heavy metals from simulated water by using eggshell powder S. Özcan, H. Çelebi, Z. Özcan (Turkey)	75
Development of highly flux antifouling RO polyethersulfone membrane using compacted woven support M.S. Shalaby (Egypt), V. Naddeo, L. Borea (Italy), H. Abdallah, A.M. Shaban (Egypt), T. Zarra, V. Belgiorno (Italy)	83
Shipyards waste and sustainable management in Greece: case study G. Papamanolis, E. Giannakopoulos, I.K. Kalavrouziotis (Greece)	90
Effects of egg shells for lead ions removal from aqueous solution H. Koçyiğit, B. Şahin (Turkey)	97
A novel treatment for Cd-contaminated solution through adsorption on beech charcoal: the effect of bioactivation M.R. Boni, A. Chiavola, A. Antonucci, E. Di Mattia, S. Marzeddu (Italy)	104
Uptake and transformation of oxybenzone in the presence of TiO ₂ : impact of nanoparticles on the plant remediation of an organic UV filter F. Chen (China), P. Schröder (Germany)	111

Priority pollutants and other micropollutants removal in an MBR-RO wastewater treatment system A. Plevri, C. Noutsopoulos, D. Mamais, C. Makropoulos, A. Andreadakis, E. Lytras, S. Samios (Greece)	121
Use of halloysite–TiO ₂ nanocomposites for the decomposition of tebuconazole fungicide in water D. Panagiotaras, V. Bekiari, E. Stathatos, D. Papoulis, G. Panagopoulos, A.N. Kalarakis, I. Iliopoulos, E. Kourkouta, P. Mavrokota (Greece)	132
The kinetics of cadmium sorption by polyelectrolyte-coated fly ash from aqueous solution F. Olabemiwo, B. Tawabini, F. Patel, T. Oyehan, M. Khaled, T. Laoui (Saudi Arabia)	140
Isolation of microalgae with potential for integrated biomass production and nutrient removal from wastewater Jen-Jeng Chen, Yu-Ru Lee, Yu-Cheng Huang, Wei-Han Lee (Taiwan)	151
Evaluation of nitrous oxide gaseous emissions from a partial nitrification reactor operating under different conditions S. Milia, G. Tocco, G. Erby, A. Carucci (Italy)	158
Thermal, alkali and thermo-alkali pretreatments applied to monospecific microalgal biomass to improve anaerobic biogas production G. Campo, V.A. Riggio, A. Cerutti, B. Ruffino, D. Panepinto, M.C. Zanetti (Italy)	165
Exploratory study to assess the use of lanthanum-modified chitosan as a potential phosphorous adsorbent M. Elsergany, A. Shanbleh (UAE)	171
Groundwater treatment by electro dialysis: gearing up towards green technology R.M.O. Mendoza, M.L.P. Dalida (Philippines), Chi-Chuan Kan, Meng-Wei Wan (China)	178
Evaluation of a pilot plant for a secondary treatment of mining effluents N. Yfantis, A. Yfantis, G. Giannakakis, V. Gazea (Greece)	184
Fouling mechanisms in nanofiltration membranes for the treatment of high DOC and varying hardness water N. Jha, Z.L. Kiss, B. Gorczyca (Canada)	197
Ablution grey water qualitative assessment and treatment by submerged membrane bioreactor: a case study in Jordan Z. Al-Ghazawi, A. Qasaimeh, K. Bani-Melhem (Jordan)	213
Spatial-temporal distribution characteristics and source analysis of sediments in Qinghai Lake, China Hai-lin Niu, Guang-wei Zhu, Meng-yuan Zhu, Bo-qiang Qin, San-chuan Ni (China)	222
Facile synthesis of ethylenediamine-modified magnetic chitosan composite and its adsorption property Min Wu, Yunshan Bai, Kewang Wang, Wenyun Li, Dandan Xu, Hongzhu Ma (China)	231
Removal of metronidazole from aqueous solutions by different natural surfactant modified zeolitic tuffs A. González-Ortiz, J.J. Ramírez-García, M.J. Solache-Ríos (Mexico)	243
Performance of combined PTFE hydrophilic and hydrophobic membrane during laundry/detergent wastewater treatment by air gap membrane distillation (AGMD): an experimental study I.J. Siddique, R. Bahar, S. Ibrahim, M.H.F. Al Hazza (Malaysia)	255
Performance analysis of biomass-based absorber solar still through ANN and MLR approach M.A. Balu, D.V. Siva Krishna Rao K, M. Premalatha (India)	262
Kinetics, thermodynamics and isotherm parameters of uranium(VI) adsorption on natural and HDTMA-intercalated bentonite and zeolite A. Krajňák, E. Viglašová, M. Galamboš (Slovakia), L. Krivosudský (Slovakia, Austria)	272
Facile synthesis of Fe-Al bimetallic hydroxides and its application for individual and competitive adsorption of Cr(VI) and As(III) Yiang Fan Yunhai Wu, Haitao Sha, Zhengyuan Zhou (China)	282
Effect of plant harvesting on greenhouse gas emission from vertical subsurface flow constructed wetlands treating low-strength sewage S. Nutanong, C. Chiemchaisri, W. Chiemchaisri, S. Kantawanichkul (Thailand)	297
Bioflocculation technology for total nitrogen removal from tannery wastewater Changqing Zhao, Wei Zou, Li Shu, Qinhuan Yang (China)	309
Study on the adsorption/degradation of Rhodamine B by Fenton-like reagent based on carbon nanotubes Ting Zhao, Min Yang, Mei Bai (China), C.J. Barrow, Wenrong Yang (Australia), Wei Tan, Hongbin Wang (China)	313

One-step surface-functionalization of polydopamine-modified multiwalled carbon nanotubes for the selective removal of organic dyes from aqueous solutions Fangli Liao, Kejun Feng, Luigi Agostini, Xianfeng Li (China)	325
Fenton oxidation of Diamine Blue 3B using heterogeneous catalyst based on hydroxyapatite nanoparticles A. Dehghanpour Farashah, S. Hashemian, F. Tamaddon (Iran)	334
Comparative study of malachite green adsorption onto activated carbon prepared from <i>Ziziphus</i> wood and ZnO nanoparticles loaded AC: artificial neural network modelling and optimization A. Mohammadi, M. Ghaedi, M.M. Sabzehmeidani (Iran)	343
Combined catalytic ozonation and electroflocculation process for the removal of basic yellow 28 in wastewater A. Ikhlq, M. Kazmi, F. Javed (Pakistan), K.S. Joya (Denmark), F. Anwar (Pakistan)	354
Discoloration of industrial effluents by adsorption-based treatment onto coal fly ash activated with lime C. Zaharia (Romania)	364
Author Index	377
