

Contents

Volume 292

A novel hybrid compact system of photovoltaic solar still air gap membrane distillation for the simultaneous production of water and energy
A.A. Alanezi (Kuwait), Arsen Hakobyan, Arusyak Hakobyan (Armenia), M. Bassyouni (Egypt) 1

Optimizing solar distillation to meet water demand for small and rural communities
A. Aboulfotouh, G. Heikal, Y. El Ghareb, A. Abdo (Egypt) 10

Solar still with a hemispherical chamber stepwise basin and additional heaters powered by a PV system
S. Abdallah (Jordan), D. Afaneh (Saudi Arabia), M.T. Nasir (Jordan) 22

The fulfilled promise: a green way for seawater desalination through reverse osmosis
J. Barraza Soto (Chile), J.A. López Ramirez (Spain), G.E. Merino, C. Basulto Millar, M. Morales, M. Martinez, B. Miranda-Godoy (Chile), J.M.G.P. Isidoro (Portugal) 34

Effect of operating temperature on reverse solute flux in forward osmosis by incorporating the surface charge density
Luopeng Yang, Dianchen Gai, Yongsheng Tian (China) 49

Acquisition and analysis of floc images by machine learning technique to improve the turbidity removal process
F. Paredes Larroca, J. Quino-Favero, U. Rojas Villanueva, E. Saettone Olschewski (Peru) 60

Modeling of stormwater infiltration basin enhanced with drywells technique
Z. Helles, Y. Mogheir (Palestinian Authority) 69

Geochemical effects of different types of mine water on the weathered coal gangue after coal seam backfill mining: an example from Shandong mining area, Northern China
Dong-jing Xu, Kai-ming Ji, Jin-jin Tian, Tian-hao Liu (China) 84

Removal of lead metal from groundwater using graphene oxide nanosheet functionalized with ethylene diamine tera-acetic acid
R.A. Rayan, W.F. Khalil, M.A. Sadek (Egypt) 97

Ipomoea batatas vine-derived activated carbon: a utility and efficient adsorbent for removing Cr(VI) from aqueous solution
Jiahui Deng, Min Liu, Xu Gong, Haisheng Tao (China) 108

Facile synthesis of Cu-complex for visible-light photodegradation of organic dyes and sulfonamide antibiotics with added H₂O₂
Dawei Wang, Xuebing Ji, Zhengjun Shi (China) 122

Adsorption of Cd(II) and Pb(II) by Mg-modified straw biochar
Jianfeng Li (China) 131

Preparation and adsorption performance of CTMAB-bentonite on landfill leachate
Hongyu Shi, Yao Zhang, Junxiu Ye, Jiajin Yu, Lijun Luo, Hongbin Wang, Min Yang, Guizhen Li (China) 141

Efficient removal of humic acid from aqueous solutions using three-dimensional/magnetic graphene oxide allylamine/allyl glycidyl ether: optimization by Taguchi design method
S. Jafari, A.H. Javid, E. Moniri, A.H. Hassani, H.A. Panahi (Iran) 152

Assessment of the natural zeolite adsorption capacity for the removal of triclosan from the aqueous medium
B.S.G. Proença, R.S. Antonio, L.F. Cusioli, M.F. Vieira, R. Bergamasco, A.M.S. Vieira (Brazil) 165

Gemini cationic surfactant based 4-(dimethylamino)benzaldehyde: surface characteristics and biological activity, a straightforward one-step synthesis
M. Bekhit, S.H. Shafek, M.M. Younus (Egypt) 176

Less energy and aluminum electrode consumption for fluoride removal using electrocoagulation process: optimization by one-way ANOVA analysis and experimental design
Z. Zmirli, S. El Harfaoui, A. Mohssine, A. Driouch, H. Chaair, B. Sallek (Morocco) 185

Effect of lateritic iron and hydrogen peroxide for degradation and mineralization of pyridine compound 2-aminopyridines R.S. Karale, D.V. Wadkar, S. Mane, M.P. Wagh (India)	206
Fe-impregnated walnut shell biochars using iron mine tailing wastes as an efficient adsorbent for removal of synthetic dyes Songhee Baik, Doyeon Lee, Seohyun Ki, Woobeom Byeon, Yong-Gu Lee, Kangmin Chon (Korea)	216
Enabled geographic information system technology toward non-revenue water reduction H. AbuEltayef, K. AbuAlhin, K. Alastal (Palestinian Authority)	233
Author Index	247
