Volume 55 Issue 11

***Selected papers presented at the Conference on Desalination for the Environment:
Clean Water and Energy, 11–15 May 2014, Limassol, Cyprus***
(See also Volume 55 Issues 9, 10, 12, 13)

Fouling

- Detection of low concentration of assimilable organic carbon in seawater prior to reverse osmosis membrane using microbial electrolysis cell biosensor
Soon-Bee Quek, Liang Cheng and R. Cord-Ruwisch (Murdoch, Australia) 2885
- Identification of the fouling-caused foulants with different pretreatments during ultrafiltration in polluted raw water
Yongwang Liu, Xing Li, Yanling Yang, Siyang Ji, Jiawei Ren and Zhiwei Zhou (Beijing, China) 2891
- Microbubble RO membrane cleaning reduces fouling on WWRO plant
S.P. Chesters, M.W. Armstrong and M. Fazel (Middlewich, UK) 2900
- Nano-coated surfaces to mitigate fouling in thermal water services
A. Al-Janabi (Salalah, Oman) and M.R. Malayeri (Shiraz, Iran and Stuttgart, Germany) 2909
- Study of the relation between kinematic viscosity and SDI in polyethylene glycol solutions for predicting membrane fouling: preliminary test
J.M. Arnal, B. García-Fayos, V. Ruiz and M. Sancho (Valencia, Spain) 2918
- Comparison of different model solutions to simulate membrane fouling in the ultrafiltration of a secondary effluent from a municipal wastewater treatment plant
M. Torà-Grau, J.L. Soler-Cabezas, M.C. Vincent-Vela, J.A. Mendoza-Roca and F.J. Martínez-Francisco (Valencia, Spain) 2924
- Abatement of deposit formation in aqueous systems using various projectiles
M.R. Malayeri (Shiraz, Iran and Stuttgart, Germany) and M.R. Jalalirad (Stuttgart, Germany) 2931

Novel membranes

- Improvement of reverse osmosis performance of polyamide thin-film composite membranes using TiO₂ nanoparticles
A.-H.M.A. El-Aassar (Cairo, Egypt) 2939
- Synthesis of nanocomposite membranes and their application in photocatalytic process for organic pollutions removal from groundwater, East Nile Delta, Egypt
M.M. Abo El-Fadl, A.H.M. El-Aassar and A.A. Mohamed (Cairo, Egypt) 2951
- Improving second-pass permeate quality using thin film nanocomposite (TFN) membranes
M.B. Dixon and D. Kim-Hak (El Segundo, CA, USA) 2962
- Sorption of single enantiomers and racemic mixture of (+/-)- α -pinene into Nafion membranes
L. Brošová, J. Žitka, P. Sysel, Š. Hovorka, A. Randová, J. Storch, M. Kačírková and P. Izák (Prague, Czech Republic) 2967
- Suitability of cationic flocculants for RO membranes performance improvement
N. Peña, F. del Vigo, O. Salmerón, J. Rodríguez, A. Borrel (Madrid, Spain) and S.P. Chesters (Middlewich, UK) 2973
- Silica porous membranes synthesis and characterization
N. Agoudjil, N. Lamrani (Algiers, Algeria) and A. Larbot (Montpellier, France) 2988
- Laccase-catalyzed modification of PES membranes using amine-bearing modifiers
N. Nady and A.H. El-Shazly (Alexandria, Egypt) 2996

Energy consumption/energy recovery

High-permeability FILMTEC™ SEAMAXX™ reverse osmosis elements: a success story in the Canary Islands B. Salgado, J.M. Ortega, J. Blazheska, J. Sanz and V. García-Molina (Tarragona, Spain)	3003
Heating seawater: the solution or the pipe dream of reverse osmosis electrical consumption S. Delagarde and S. Bertrand (Rueil-Malmaison, France)	3012
Experimental comparison of the performance of two reverse osmosis desalination units equipped with energy recovery devices E. Dimitriou, E.Sh. Mohamed, C. Karavas and G. Papadakis (Athens, Greece)	3019
Larnaca SWRO upgrade B. Schneider (Egliswil, Switzerland)	3027
Las Palmas' ERD experience J. Marcos and J. Morgade (Coslada, Spain)	3034
Lahat BWRO plant: technical and economical evaluation of energy recovery alternatives A. Lakretz, M. Adler, E. Orly and M. Priel (Tel-Aviv, Israel)	3040
Energy recovery using salinity differences in a multi-effect distillation system K. Touati (Valladolid, Spain), A. de la Calle (Almería, Spain), F. Tadeo (Valladolid, Spain), L. Roca (Almería, Spain), T. Schiestel (Stuttgart, Germany) and D.-C. Alarcón-Padilla (Almería, Spain)	3048

Renewable energy

A new assessment of combined geothermal electric generation and desalination in western Saudi Arabia: targeted hot spot development T.M. Missimer (Fort Myers, FL, USA and Thuwal, Saudi Arabia), P. Martin Mai and N. Ghaffour (Thuwal, Saudi Arabia)	3056
The viability of renewable energy and energy storage as the power source for municipal-scale reverse osmosis desalination C. Dansoh (Brighton, UK)	3064
A flexible techno-economic model for the assessment of desalination plants driven by renewable energies M. Moser, F. Trieb, T. Fichter, J. Kern and D. Hess (Stuttgart, Germany)	3091
Wind-powered RO desalination T. Bilstad, E. Protasova, A. Simonova, S. Stornes (Stavanger, Norway) and I. Yunezi (Sumatera, Indonesia)	3106
Multiple reverse osmosis sub-units supplied by unsteady power sources for seawater desalination G. Kosmadakis, D. Manolakos, E. Ntavou and G. Papadakis (Athens, Greece)	3111
Renewable energy desalination: performance analysis and operating data of existing RES-desalination plants A. Cipollina (Palermo, Italy), E. Tzen (Athens, Greece), V. Subiela (Las Palmas, Spain), M. Papapetrou (Münich, Germany), J. Koschikowski, R. Schwantes (Kassel, Germany), M. Wiegand (Freiburg, Germany) and G. Zaragoza (Almería, Spain)	3120
Uninterrupted eight-year operation of the autonomous solar photovoltaic reverse osmosis system in Ksar Ghilène (Tunisia) B. Peñate, V.J. Subiela, F. Vega, F. Castellano, F. Julián Domínguez and V. Millán (Las Palmas, Spain)	3141

Hybrid

Operational experience from hybrid RO system at SAFI wastewater re-use RO plant C. Bartels (Oceanside, CA, USA), R. Boda (Dubai, UAE) and A. Abrar (Sharjah, UAE)	3149
Pressure-assisted osmosis (PAO)-RO hybrid: impact of hydraulic pressure on fouling and economics G. Blandin (Sydney, Australia and Ghent, Belgium), A. Verliefde (Ghent, Belgium) and P. Le-Clech (Sydney, Australia)	3160
