

Effect of alkaline and ozone pretreatment on sludge reduction potential of a membrane bioreactor treating high-strength domestic wastewater M. Suresh Karthik Kumar, T. Krishna Kumar (Tirunelveli, India), P. Arulazhagan (Jeddah, Saudi Arabia), S. Adish Kumar (Tirunelveli, India), Ick-Tae Yeom (Suwon, Korea) and J. Rajesh Banu (Tirunelveli, India)	1127
Comparison of the efficiency of extended aeration activated sludge system and stabilization ponds in real scale in the removal of protozoan cysts and parasite ova from domestic wastewater using Bailenger method: a case study, Kermanshah, Iran K. Sharafi, M. Moradi (Kermanshah and Tehran), A. Karami (Kermanshah and Hamadan) and T. Khosravi (Kermanshah, Iran)	1135
Pilot-scale experiments on brewery wastewater treatment and sludge reduction based on food chain predation Tianlong Zheng, Peng Li, Qunhui Wang, Xuesong Li (Beijing), Hengyu Ai (Harbin), Kemin Gan and A. Sharavsambuu (Beijing, China)	1142
Study of the prospects for agricultural utilization of sludge produced from WWTPS in North Central Algeria M. Nakib, A. Kettab (Algiers, Algeria), A. Berreksi (Bejaia, Algeria) and L. Mandi (Marrakech, Morocco).....	1152
PVDF/PMMA membranes for lemon juice clarification: fouling analysis L.R. Firmán, C. Pagliero (Río Cuarto), N.A. Ochoa and J. Marchese (San Luis, Argentina)	1167
The IAPWS industrial formulation for the thermodynamic properties of seawater H.-J. Kretschmar (Zittau, Germany), R. Feistel (Warnemuende, Germany), W. Wagner (Bochum, Germany), K. Miyagawa (Tokyo, Japan), A.H. Harvey (Boulder, CO, USA), J.R. Cooper (London, UK), M. Hiegemann, F.L. Blangetti (Baden, Switzerland), K.A. Orlov (Moscow, Russia), I. Weber (Erlangen, Germany), A. Singh (Schenectady, NY, USA) and S. Herrmann (Zittau, Germany)	1177
Microbial community dynamics in hybrid biological reactor treating petrochemical wastewater Ruofei Jin, Guangfei Liu, Jing Wang, Jingmei Li and Jiti Zhou (Dalian, China)	1200
Removal of heavy metal ions from water by hydroxyl terminated triazine based dendrimer D. Gajjar, R. Patel, H. Patel and P.M. Patel (Anand, India)	1209
Zinc hexacyanoferrate loaded mesoporous MCM-41 as a new adsorbent for cesium: equilibrium, kinetic and thermodynamic studies S. Vashnia (Saveh), H. Tavakoli (Nour), R. Cheraghali (Saveh) and H. Sepehrian (Tehran, Iran)	1220
An ion-imprinted chitosan/Al ₂ O ₃ composite material for selective separation of copper(II) Jianxian Zeng, Huajun Chen (Xiangtan), Xinke Yuan (Changsha), Qiannan Guo and Xie Yu (Xiangtan, China)	1229
Adsorption competition of Cu(II) ion in ionic pair and multi-metal solution by ionic imprinted amino-silica hybrid adsorbent Buhani (Bandar Lampung), Narsito, Nuryono, E.S. Kunarti (Yogyakarta) and Suharso (Bandar Lampung, Indonesia)	1240
Removal of copper by surface-modified celluloses: kinetics, equilibrium, and thermodynamics Chung-Hsin Wu (Kaohsiung, Taiwan), Chao-Yin Kuo (Yunlin, Taiwan), Pui-Kwan Andy Hong (Salt Lake City, UT, USA) and Meng-Jia Chen (Chang-Hua, Taiwan)	1253
Adsorption of lead ions from aqueous solutions by citric acid-modified celluloses Chao-Yin Kuo (Yunlin), Chung-Hsin Wu (Kaohsiung) and Meng-Jia Chen (Chang-Hua, Taiwan)	1264
Removal of nickel(II) and cadmium(II) ions from aqueous solutions using an oxide adsorbent of MgO-SiO ₂ type F. Ciesielczyk, P. Bartczak and T. Jesionowski (Poznan, Poland)	1271

Arsenic removal of high-arsenic wastewater from gallium arsenide semiconductor production by enhanced two-stage treatment Anfeng Li, Jianping Luo, Wenjiang Xu and Tao Pan (Beijing, China)	1285
Immobilization of laccase on chitosan–halloysite hybrid porous microspheres for phenols removal Jilei Yao, Qiuru Wang, Yanyan Wang, Yatao Zhang, Bing Zhang and Hongsong Zhang (Zhengzhou, China)	1293
Effect of sodium dodecyl benzene sulfonate on the process of Fenton degradation of 4-chlorophenol C.W. Yang (Jilin), D. Wang (Dalian) and Q. Tang (Jilin and Dalian, China)	1302
Phosphorus recovery from waters using nanofiltration C. dos Santos (Faro), A. Ribeiro (Caparica) and M. Ribau Teixeira (Faro, Portugal)	1308
High nitrate removal by autohydrogenotrophic bacteria in a biofilm-electrode reactor Dan Chen, Kai Yang and Hongyu Wang (Wuhan, China)	1316
A novel process for bromate removal from water using calcined Zn-Al layered double hydroxides Yan Zhang, Xinlong Li and Hongyuan Liu (Hangzhou, China)	1325
Litchi pericarps used as adsorbents for methylene blue removal from solution Xinge Pan, Xiaochen Li, Jili Yang, Shujuan Sun, Jiyu Tian and Zhenglei Kong (Tai'an, China)	1333
<i>Sargassum wightii</i> , a marine algae is the source for the production of algal oil, bio-oil and application in the dye wastewater treatment P. Senthil Kumar, J. Pavithra, S. Suriya, M. Ramesh and K. Anish Kumar (Chennai, India)	1342
Application of conventional and statistical experimental methodology to optimize malachite green dye removal from aqueous solutions Sook-Thing Ong, Siew-Teng Ong (Kampar, Malaysia), Yung-Tse Hung (Cleveland, OH, USA) and Yi-Pin Phung (Kampar, Malaysia).....	1359
Fixed-bed column studies for the removal of cationic and anionic dyes by chemically modified oil palm empty fruit bunch fibers: single- and multi-solute systems M.S. Sajab, C.H. Chia, S. Zakaria (Bangi, Malaysia) and M. Sillanpää (Mikkeli, Finland)	1372
Adsorption of tetracycline on montmorillonite: influence of solution pH, temperature, and ionic strength Po-Hsiang Chang (Tainan, Taiwan), Zhaohui Li (Tainan, Taiwan, and Kenosha, WI, USA), Wei-Teh Jiang (Tainan, Taiwan), Chung-Yih Kuo (Taichung, Taiwan) and Jiin-Shuh Jean (Tainan, Taiwan)	1380
Feasibility study of ultrasound as water disinfection technology S. Vajnhandl, T. Željko, A. Majcen Le Marechal and J. Volmajer Valh (Maribor, Slovenia)	1393
Innovative approach for the development of a water quality identification index – a case study from the Wen-Rui Tang River watershed, China Xiaoxue Ma (Nanjing and Wenzhou, China), Xu Shang (Wenzhou, China), Lachun Wang (Nanjing, China), R.A. Dahlgren and Minghua Zhang (Wenzhou, China, and Davis, CA, USA)	1400
Author Index	1411
