

Growth of Desalination and Water Treatment

To editors, authors and readers of Desalination and Water Treatment

We are pleased to announce a 60%+ growth of the journal. In 2013, to enable quicker publication of papers in our growing field, we will publish 8,000 pages a year rather than 5,000 pages published in previous years.

We are embarking on a new numbering system for the journal. Till now we have organized papers in volumes appearing monthly (Volumes 1 to 50 from 2009 to 2012). Now we will organize papers in one volume for the whole year with 3 issues each. Therefore in 2013 we will publish Volume 51 in 42 issues. There will be 6 issues in January and February and 3 issues a month from March to December.

The 60%+ growth will enable quicker publication but also accounts for the price increase which we hope you will understand will enable growth of the journal in keeping with the growth of research and development in desalination and water treatment. Please note that subscription prices have increased by around one third of the amount of additional content. We hope that libraries, authors and readers will recognise the excellent value that the prime journal in the field continues to provide in this essential area of research.

Best wishes to all for the holiday season and the coming year.

Miriam Balaban
Editor in Chief

Volume/issues	Date	Volume/issues	Date
51/1–3	January	51/22–24	June
51/4–6	January	51/25–27	July
51/7–9	February	51/28–30	August
51/10–12	February	51/31–33	September
