### Volume 181

|                                                                                                                                                                                                                                                                  |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Impacts of projected changes in feed-water salinity on the City of Cape Coral Florida north brackish-water reverse osmosis desalination plant operation<br>N.J. Harvey, T.M. Missimer (USA) .....                                                                | 1   |
| Environmental impacts of reject brine disposal from desalination plants<br>C. Rodrigues Anders, C. dos Santos Fernandes, N. da Silva Dias, J.W. da Silva Gomes,<br>M.R. de Souza Melo, B.G.A. de Souza, A.C. Medeiros Souza, F.S. de Sousa Júnior (Brazil) ..... | 17  |
| Nanofiltration performance prediction for brackish water desalination:<br>case study of Tunisian groundwater<br>M.A. Kammoun (Tunisia, France), S. Gassara, J. Palmeri (France), R. Ben Amar (Tunisia),<br>A. Deratani (France) .....                            | 27  |
| Linear programming determination of blend ratios for desalinated water produced by multistage flash and reverse osmosis in a hybrid plant<br>Y. Nishi, Liu Qian, M. Higashimoto, M.A. Abdelmoneim (Japan) .....                                                  | 40  |
| Techniques for water disinfection, decontamination and desalinization: a review<br>J. Zuluaga-Gomez (Spain, Colombia, France), P. Bonaveri, D. Zuluaga (Colombia),<br>C. Álvarez-Peña, N. Ramírez-Ortiz (Spain) .....                                            | 47  |
| Polyelectrolyte self-assembly on polymeric nanofiltration substrates:<br>Insight into thin film growth and surface modification<br>M.M. Motse (South Africa), B.B. Mamba (South Africa, China) .....                                                             | 64  |
| Design recommendations and cost assessment for non-stop off-grid plants of seawater desalination based on PV-driven with wind/diesel energy backup<br>V.J. Subiela, B. Peñate, L. García-Rodríguez (Spain) .....                                                 | 80  |
| Performance of bubble column humidification-dehumidification (HDH) desalination system<br>B.A. Abdelkader (Canada, Saudi Arabia), M. Khan, M.A. Antar, A.E. Khalifa (Saudi Arabia) .....                                                                         | 101 |
| Biomass as a renewable energy source for water desalination: a review<br>A. Amiri, C.E. Brewer (USA) .....                                                                                                                                                       | 113 |
| Performance evaluation of anaerobic moving bed bioreactor (An-MBBR)<br>for pretreatment of desizing wastewater<br>H.M.A. Shahzad (Pakistan), C. Baumann (Germany), S.J. Khan (Pakistan),<br>H. Schönberger, F.-A. Weber (Germany), Zeshan (Pakistan) .....       | 123 |
| Bioelimination of phenanthrene using degrading bacteria isolated from petroleum soil: safe approach<br>A.S. Abdel-Razek, H.H. El-Sheikh, W.B. Suleiman, T.H. Taha, M.K. Mohamed (Egypt) .....                                                                    | 131 |
| Case study of pump scheduling using sensor-based real-time pump efficiency monitoring<br>Heekyong Oh, Jungyeol Eom, Taehoon Kim (Korea) .....                                                                                                                    | 141 |
| Cross-scale analysis of the energy recovery process in pressure exchanger and pipeline system<br>Zheng Cao, Jianqiang Deng, Fanghua Ye (China) .....                                                                                                             | 151 |
| Halophilic bacterial community and their ability to remove zinc oxide and titanium dioxide nanoparticles from wastewater<br>V. Weber, I. Kamika, M.N.B. Momba (South Africa) .....                                                                               | 161 |
| Treatment of domestic sewage by biological contact oxidation of different packings under hypoxia<br>Chunhong Shi, Yao Zhang, Xiaolong Huang, Xinfai Zhang (China) .....                                                                                          | 188 |
| Comparative analysis of the phosphorus removal characteristics between two-stage and single-stage SBR processes for phosphorus and nitrogen removal<br>Hongyan Li, Lei Bai, Beisheng Long, Hua Kang, Hongbo Liu, Shuping Wang, Xi Nie (China) .....              | 197 |
| Influence of solids contained in septic tank effluent on lifespan of soil infiltration systems<br>M. Spychała, M. Pawlak, M. Makowska (Poland) .....                                                                                                             | 204 |
| Modelling of lead ions transport through bulk liquid membrane<br>A.D.Z. Albdiri, A.A. Mohammed, M. Hussein (Iraq), S. Koter (Poland) .....                                                                                                                       | 213 |

|                                                                                                                                                                                                                                                                                                                       |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Bacterial contamination in drinking water of urban Peshawar:<br>a comparative study at the sources and user points of tube wells<br>S. Khan, S. Ali, S. Muhammad, B. Khan, A. Ali (Pakistan), A.E.-L. Hesham (Egypt),<br>S. Begum (Pakistan) .....                                                                    | 221 |
| Optimizing of <i>Microcystis aeruginosa</i> inactivation in freshwater using algicidal <i>Bacillus subtilis</i><br>by central composite design<br>A.A. Al-Hakimi (Saudi Arabia, Yemen), F. Alminderej (Saudi Arabia), E. Noman (Yemen, Malaysia) .....                                                                | 228 |
| Water quality and health risk of public drinking water sources:<br>a study of filtration plants installed in Rawalpindi and Islamabad, Pakistan<br>M.T. Sohail (China), Y. Mahfooz, R. Aftab (Pakistan), Y. Yen, M.A. Talib, A. Rasool (China) .....                                                                  | 239 |
| Synthesis of zinc oxide nanoparticles impregnated clay tablets and their potential applications<br>as point of use water purification intervention<br>A. Samad, M.I. Din, M. Ahmed (Pakistan) .....                                                                                                                   | 251 |
| Fluoride in groundwater in the Bongo District, Ghana:<br>an assessment, health impact and possible mitigation strategies<br>F. Atipoka (Ghana), A.I. Schäfer (Germany), F. Momade (Ghana) .....                                                                                                                       | 258 |
| Comprehensive evaluation of water resources utilization benefits based on catastrophe theory<br>Meimei Wu (China), Wei Ge (China, The Netherlands), Zening Wu, Zongkun Li (China) .....                                                                                                                               | 273 |
| Removal, optimization and kinetic modelling of high concentration of methyl tertiary butyl ether<br>from aqueous solutions using copper oxide nanoparticles and hydrogen peroxide<br>F. Abbasi, M.R. Samaei, A. Azhdarpoor, M. Jalili, H. Maleknia, A. Mehdizadeh (Iran) .....                                        | 278 |
| Dynamic sorption of hexavalent chromium using sustainable low-cost eggshell membrane<br>A. Lahmar, Z. Hattab, R. Zerdoum, N. Boutemine, R. Djellabi, N. Filali, K. Guerfi (Algeria) .....                                                                                                                             | 289 |
| Graphene-supported iron-based composites: a review of applications to wastewater treatment<br>Xianliang Wu, Rensheng Cao, Jiwei Hu, Chao Zhou, Liya Fu, Xionghui Wei (China) .....                                                                                                                                    | 300 |
| Isolation and identification of cold-tolerance aerobic denitrifier <i>Pseudomonas plecoglossicida</i> Y-1<br>Shu-di Xiang, Zhen-lun Li, Qing Ye, Teng-xia He, Yi Xu, Xue-jiao Huang, Mi Feng (China) .....                                                                                                            | 321 |
| A transfer-learning-based feature classification algorithm for UAV imagery in crop risk management<br>Shubo Wang, Yu Han, Jian Chen, Yue Pan, Yi Cao, Hao Meng (China) .....                                                                                                                                          | 330 |
| Effect of treated wastewater on strawberry<br>Y. Djillali, M.N. Chabaca, S. Benziada, H. Bouanani (Algeria), L. Mandi (Morocco),<br>M.C. Bruzzoniti (Italy), N. Boujelben (Morocco), A. Kettab (Algeria) .....                                                                                                        | 338 |
| Nano spinels of copper-doped cobalt aluminate ( $\text{Co}_x \text{Cu}_{(1-x)} \text{Al}_2 \text{O}_4$ ) for removal of Cd(II)<br>from aqueous solutions<br>A. Shamsi, S. Hashemian (Iran) .....                                                                                                                      | 346 |
| Removal of highly toxic Cd(II) metal ions from aqueous medium using magnetic nanocomposite:<br>adsorption kinetics, isotherm and thermodynamics<br>A.A. Alqadami, Mu. Naushad, T. Ahamad, M. Algarni, A. Alshahrani (Saudi Arabia),<br>H. Uslu (Turkey), S.K. Shukla (China) .....                                    | 355 |
| Intensified adsorption of cesium by PVDF-g-caffein acid/Prussian blue/polytetrafluoroethylene<br>sandwich membranes<br>Shuang Hao, Zhiqian Jia (China) .....                                                                                                                                                          | 362 |
| Enhanced removal of arsenic and fouling mitigation of nanofiltration process<br>via coagulation pretreatment<br>Changwei Zhao, Ling Yu, Lili Xu, Yang Yu (China) .....                                                                                                                                                | 369 |
| Isotherm, kinetic and thermodynamic studies for adsorption of lead(II) onto modified Aloji clay<br>K.S. Obayomi, M. Auta, A.S. Kovo (Nigeria) .....                                                                                                                                                                   | 376 |
| Aqueous degradation of esculetin (6,7-dihydroxycoumarin) using gamma radiation<br>J. Madureira, M.L. Botelho (Portugal), W.J. Cooper (USA), J.P. Leal, R. Melo (Portugal) .....                                                                                                                                       | 385 |
| Synthesis and characterization of $\text{FeNi}_3$ nanoparticles and their application as catalysts<br>for penicillin G degradation in a Fenton-like reaction<br>A.H. Panahi, M. Kamranifar, M.H. Moslehi (Iran), S. Rodriguez-Couto (Spain), N. Nasseh (Iran) .....                                                   | 391 |
| Removal of methylene blue dye from synthetic aqueous solutions<br>using dimethylglyoxime modified amberlite IRA-420: kinetic, equilibrium and thermodynamic studies<br>A.E.M. Mekky, M.M. El-Masry, R.E. Khalifa, A.M. Omer, T.M. Tamer (Egypt),<br>Z.A. Khan, M. Gouda (Saudi Arabia), M.S. Mohy Eldin (Egypt) ..... | 399 |

|                                                                                                                                                                                                                                |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Production and characterization of Ti-doped SrAl <sub>2</sub> O <sub>4</sub> via volume combustion synthesis:<br>application for dye removal<br>P. Demircivi, M. Bugdayci (Turkey) .....                                       | 412 |
| Toxic yellow cow dung powder (Auramine O dye) removal via Ipomoea aquatica waste<br>Y.C. Lu (Brunei), N. Priyantha (Sri Lanka), L.B.L. Lim (Brunei), M. Suklueng (Thailand) .....                                              | 422 |
| Influence of natural and synthetic blended polymers on the electrospun PVA/chitosan/PANI<br>composite nanofibers to be used for dye decolorization<br>M.A. Khalil, M.F. El-Kady, G.M. El-Subrouti, E.M. El-Sayed (Egypt) ..... | 436 |
| Author Index .....                                                                                                                                                                                                             | 447 |
