

Contents

Volume 104

Experimental study on lens type solar still with single slope and single basin
Zhilin Sun, Shibiao Fang, Dan Xu, Wenrong Tu (China) 1

CFD simulation and second law analysis of weir-type cascade solar stills
with different number and dimensions of steps
F. Alipanah, N. Rahbar (Iran) 15

Performance assessment of a cross-flow packed-bed humidification-dehumidification (HDH)
desalination system – the effect of mass extraction
D.U. Lawal, M.A. Antar, A. Aburub, M. Aliyu (Saudi Arabia) 28

Desalination, transboundary water desecuritization and cooperation
M. Walschot (Belgium) 38

Fouling due to CaSO₄ scale formation in forward osmosis (FO), reverse osmosis (RO),
and pressure assisted forward osmosis (PAFO)
Hwan Kim, Sengmin Park, Yongjun Choi, Sangho Lee, Juneseok Choi (Korea) 45

Influence of surface properties of PVDF/MWNTHPAE nanocomposite membrane
on the anti-biofouling performance
Xiaoyu Zhao, Dongwei Lu, Meiyu Zheng, Yumeng Zhao, Jun Ma, Jianmin Gu (China) 51

Enhanced anti-fouling property of poly(vinyl chloride) membrane
by blending poly(*N*-acryloylmorpholine)-grafted ZrO₂ nanoparticle
Xiang Shen, Tiande Xie, Jiangang Wang, Fan Wang 62

Development of an investment efficiency evaluation model for waterworks maintenance
through data envelopment analysis
Kibum Kim, Juyeop Kim, Sanghyuk Park, Jayong Koo (Korea) 73

Effects of polyacrylamide molecular weight on the effectiveness of sludge-recycling enhanced flocculation
Jia Zhu, Wei Wei, Chaosheng Zhang, Hongwei Rong, Yongfeng Cao (China) 83

PCDD/Fs into sediments of Aqaba Coastal City, Jordan: the relation to atmospheric pollution
M.N. Saidan, M.A. Hararah, Z. Alhamamre, J. Alsawair, R.A. Damra (Jordan),
B. Bataineh, M. Badran (Saudi Arabia) 91

Optimal design of water distribution networks using simple modified particle swarm optimization approach
A. Moghaddam, A. Alizadeh, A. Faridhosseini, A.N. Ziaei, D. Fallah Heravi (Iran) 99

Shrimp shell waste – a sustainable green solution in industrial effluent treatment
S. Vishali, P. Sengupta, R. Mukherjee, N. Rao (India) 111

Synthesis, characterization and performance of iron oxide/alumina-based nanoadsorbents
for simultaneous arsenic and fluoride removal
T.C. Prathna, D.N. Sitompul, S.K. Sharma, M. Kennedy (The Netherlands) 121

Equilibrium, kinetics, mechanism and thermodynamics studies of As(III) adsorption
from aqueous solution using iron impregnated used tea
T. Mahmood, M. Aslam, A. Naeem, R. Ali, T. Saddique (Pakistan) 135

Chemically modified hydroxyethylcellulose: a high capacity sorbent for removal of As(III) and As(V)
from aqueous solution
M.A. Hussain, A. Abbas, M. Sher, M. Naeem-ul-Hassan (Pakistan) 149

Fabrication of layered Al-silicate magadiites for the removal of reactive dyes from textile effluents
K. Ahmed (Brazil), A.J. Khan (China), C.T.G.V.M.T. Pires, M. Yamin (Brazil),
F. Rehman, A. Rahim (Brazil, Pakistan), Jinxi Song (China), C. Airoidi (Brazil) 159

Adsorption of heavy metals on activated carbons and their respective lignocellulosic precursors:
experimental and theoretical approach
A.A. Peláez Cid, A.M. Herrera González, M. Salazar Villanueva (Mexico) 169

Evaluation of activation parameters of activated carbon from coffee and cocoa seed husk rests: carbon yields and Ni(II) adsorption capacity study M. Hernández Rodríguez (Cuba), J. Yperman, R. Carleer, J. Maggen, S. Vanderheyden (Belgium), J. Falcón Hernández, A. Otero Calvis (Cuba), G. Gryglewicz (Poland)	175
Research on nitrate removal from simulated groundwater by iron nanoparticle-loaded graphene Yanhua Wang, Shengke Yang, Bin Li (China)	189
Chromium separation from oxalic acid solution by dialysis Tiangui Wang, Chuang Li (China)	201
Simultaneous removal of Na, Ca, K and Mg from synthetic brine and seawater using Fe ₂ O ₃ -SiO ₂ mixed oxide nanostructures: kinetics and isotherms studies D. Ramutshatsha, J.C. Ngila, P.G. Ndungu, P.N. Nomngongo (South Africa)	206
ZnO nanoparticles and biocidal effect of nanostructured ZnO films on <i>Escherichia coli</i> N. Bouasla, S. Abderrahmane, S. Athmani, A. Oulabbas (Algeria), M. Bououdina (Bahrain)	217
Comparative study of the adsorption of paracetamol from aqueous solution on olive stones and date pits F. Medjdoub, K. Louhab, A. Hamouche (Algeria)	225
Biodegradation of anaerobically treated distillery spent wash by <i>Aspergillus</i> species from a distillery effluent contaminated site M.P. Wagh, P.D. Nemade (India)	234
Photocatalytic degradation of TNT in wastewater using Fe doped TiO ₂ nanoparticles S.M. Ahmed, S.A. Shaban, D.S. El-Desouki, N.A.K. Aboul-Gheit, Š.M. Abdel-Azim (Egypt)	241
Photocatalytic degradation of doxycycline on ellipsoid-like BiVO ₄ synthesized by EDTA-assisted Changyu Lu, Jingjing Dang, Chentao Hou, Yunjie Jiang, Weisheng Guan (China)	250
Separation and extraction of cesium from salt lake brine by the calcium alginate-ammonium tungstophosphate composite adsorbent Tan Guo, Shan Yun, Lei He, Quan Li, Zhijian Wu (China)	257
Preparation and characterization of cellulose triacetate polymer inclusion membrane blended with acetylated kraft lignin: effect of AKL and application to the copper (II) extraction from acidic media S. Ncib (Tunisia, France), A. Barhoumi, W. Bouguerra (Tunisia), C. Larchet, L. Dammak (France), B. Hamrouni, E. Elaloui (Tunisia)	263
Stochastic optimization of water pipes for optimal replacement strategy Hwisu Shin, Jeewon Seo, Kibum Kim, Jayong Koo (Korea)	273
Evaluation of surface infiltration rate of permeable block pavements using single ring infiltrometer Eunku Lee, Jaehun Ahn, Hyun-Suk Shin (Korea)	286
Photolytic and photocatalytic degradation of febantel in aqueous media M. Čizmić, D. Ljubas, I. Škorić (Croatia), M. Rožman (Spain), D. Ašperger, L. Čurković (Croatia), M. Petrović (Spain), S. Babić (Croatia)	294
Kinetic study of food dyes removal from aqueous solutions by solar heterogeneous photocatalysis with artificial neural networks and phytotoxicity assessment W.J. Do Nascimento Júnior, O.R.S. da Rocha, R.F. Dantas, J.P. da Silva, A.A. Barbosa (Brazil)	304
Modeling and optimization of decolorization of C.I. Reactive Orange 16 via SO ₄ ^{•-} radicals by response surface methodology O.E. Kartal (Turkey)	315
Grape marc activated carbon/TiO ₂ hybrid degradation of RB5 azo dye: FT-IR and UV vis analysis S. Bourahla, C. Harrats, H. Belayachi, F. Nemchi, M. Belhakem (Algeria)	324
Degradation of methylene blue dye under visible light using silver/calcium hydroxide nanospheres E.S. Aazam (Saudi Arabia)	330
Possible utilization of PET waste as adsorbent for Orange G dye removal from aqueous media B. Cojocariu, A.M. Mocanu, G. Nacu, L. Bulgariu (Romania)	338
Optimization of Novacron Blue 4R (NB4R) removal by adsorption process on activated carbon using response surface methodology N. Barrak, R. Mannai, M. Zaidi, S. Achour, M. Kechida, A.N. Helal (Tunisia)	346
Author Index	354
