Volume 126

The membrane fouling simulator: development, application, and early-warning of biofouling in RO treatment Lan Hee Kim, M. Nava-Ocampo (Saudi Arabia), M.C.M. van Loosdrecht, J.C. Kruithof (The Netherlands), J.S. Vrouwenvelder (Saudi Arabia, The Netherlands)	1
Membrane-free electrodeionization for high-velocity production of high purity water Xindi Jin, Chidong Zhou, Zhiqiao He, Xinming Lou, Cheng Yu, Xueming Chen (China)	24
Beer and soft drinks industry wastewater treatment using an anoxic-aerobic membrane bioreactor (MBR) coupling with nanofiltration in Sahelian context B. Sawadogo, Y. Konaté (Burkina Faso), G. Lesage (France), H. MOUNGOUÉ DJANNI (Burkina Faso), F. ZAVISKA, M. HERAN (France), H. KARAMBIRI (Burkina Faso)	32
Greywater treatment for irrigation purposes using pottery scraps and aerated moving bed biofilm reactor R.S. Al-Wasify, M.N. Ali, S.R. Hamed (Egypt)	40
Hydrophilic modification of PVDF membrane with solution bulk polymerization graft and separation performance of oil–water Xiaojiao Yu, Wenqin Dai, Yingjuan Zhao, Liuyang Tang, Yuchen Wei, Binghua Yao (China)	48
Performance of a UASB reactor for low-strength wastewater treatment under different hydraulic loading rates Xin Chao Ma, Tae Woo Yi, Bong Su Lim (Korea)	60
Nanofiltration composite polymeric/ceramic membranes prepared from powder waste of ceramic tile kiln remnants S.K. Amin, H. Abdallah, S.S. Ali (Egypt), A.A. Alanezi (Kuwait, UK)	67
Analysis of effect of road sprinkling system for heat island reduction Jung-Min Lee, Jung-Hyun Yoo, Yong-Gil Jeong (Korea)	73
Hydrochemical evolution mechanism of groundwater in the People’s Victory Canal Irrigation District, China Zhongpei Liu, Wanhua Yuan, Yuping Han, Dongqing Zhang, Jianxun Liu (China)	81
Experimental parametric study of solar still coupled with humidification–dehumidification desalination system K. Zarzoum (Tunisia), K. Zhani (Tunisia, Saudi Arabia), H. Ben Bacha (Saudi Arabia)	87
Combined linear Fresnel solar Rankine cycle with multi-effect desalination (MED) process: effect of solar DNI level on the electricity and water production costs I. Baniasad Askari, M. Ameri (Iran)	97
Experimental study on desalination using electro-sorption technology with plate-type activated carbon fiber electrode Shuangchen Ma, Lan Ma, Gongda Chen, Jianing Chen, Meifang Wu (China)	116
CFD method for the relationship between the radius size of impellers and cross-sectional average velocity of flows in an oxidation ditch Jiahao Wei, Zhiqiang Xu (China)	127
CFD method for the liquid-gas two-phase flow fields in an Orbal oxidation ditch Wenli Wei, X. Chen, W.L. Lou, Y. Cai, J. Wei, Y. Zheng (China)	135
Prediction of total nitrogen removal in a structured-bed reactor for secondary and tertiary treatment of sanitary sewage N.T. Jenzura, A.C. Wendling, A. Zielinski, M.H.R.Z. Damianovic, A.C. Barana (Brazil)	144
A mathematical model for groundwater environmental quality evaluation based on entropy weight and uncertainty measure theory Hujun He, Gang Jin, Le An, Ke Han (China)	151
PVA-SiO ₂ -coated stainless steel mesh with superhydrophilic–underwater superoleophobic for efficient oil-water separation Xinying Zhang, Chaoqun Wang, Xiaoyan Liu, Jinhua Wang, Chenying Zhang, Yuling Wen (China)	157
Optimization of copper removal by acid-treated date palm seed using response surface methodology (RSM) F. Naeem, M.A. Kazmi, M. Sulaiman, C.H. Ali, N. Feroze (Pakistan)	164

Removal of Cu ²⁺ from aqueous solution by activated carbon prepared from sawdust and nutshells I. Ur Rehman, M. Zahoor, M.T. Bashir, J. Ali, F.A. Khan, M. Sher (Pakistan)	171
Single and competitive adsorptive removal of lead, cadmium, and mercury using zeolite adsorbent prepared from industrial aluminum waste R. Sánchez-Hernández, I. Padilla, S. López-Andrés, A. López-Delgado (Spain)	181
Sorption of heavy metal ions onto e-waste-derived ion-exchange material – selecting the optimum isotherm A. Kalra, P. Hadi (China), H.R. Mackey, T. Al Ansari (Qatar), G. McKay (China, Qatar)	196
Electrochemical reductive degradation of diclofenac using a palladium-modified multi-walled carbon-nanotubes electrode Pingzhou Duan, Zhao Cheng, Xiang Hu, Zhirong Sun (China)	208
Preparation and antibacterial properties of polystyrene-supported polyethylene glycols for iodine Xiguang Liu, Rongjun Qu, Ying Sun, Mingwu Yu, Yuzhong Niu, Jianhui Liu, Wanxing Luo, Shuai Fan (China)	216
Effects of calcination temperature on photocatalytic degradation of ofloxacin on Gd ₂ Ti ₂ O ₇ /HZSM-5 Wenjie Zhang, Yinghao Dong, Chuanguo Li (China)	224
Phosphate removed from aqueous solution by electrochemical oxidation of ferrous iron Shunxi Zhang, Zhen Yue, Zhaoqiang Guo, Qunpeng Cheng, Yunjun Mei, Mei Wang, Jianfen Li (China)	231
Phosphorus removal of retrofit bioretention systems on urban surface runoff Chunbo Jiang, Jiake Li, Binhong Zhang, Huaie Li (China)	239
Ecofriendly biosorption of atrazine herbicide in aqueous solution by <i>Moringa oleifera</i> Lam: kinetics, equilibrium and thermodynamics P.F. Coldebella, M.R. Fagundes-Klen, D. Rezende, A.T.A. Baptista, L. Nishi, Q.L. Shimabuku, R. Bergamasco (Brazil)	248
Application of defatted <i>Moringa oleifera</i> seeds from compressed propane extraction in the removal of emerging microorganisms F.P. Camacho, L.O.R. Moreti, Q.L. Shimabuku, L. Nishi, A.T.A. Baptista, F.J. Bassetti, R. Bergamasco (Brazil)	259
Integrated optimization of water and fertilizer coupling system under uncertainty Xiao Liu, Mo Li, Ping Guo, Zhongxue Zhang (China)	268
Forms, migration and transportation of nitrogen in sediments and suspended solids of endogenous nutrient-controlled lakes Wenwen Wang, Shuhang Wang, Xia Jiang, Binghui Zheng, Li Zhao, Bo Zhang, Junyi Chen (China)	278
Furfural degradation using an electrochemical advanced oxidation process (EAOP): optimization of operating parameters using Taguchi approach G. Azarian, M. Leili, K. Godini, J. Faradmal, S. Bajalan (Iran)	287
Industrial wastewater decolorization by activated carbon from <i>Ziziphus lotus</i> A. Msaad, M. Belbahloul, S. El Hajjaji, B.H. Beakou, M.A. Houssaini, C. Belhajjia, H. Aassila, A. Zouhri, A. Anouar (Morocco)	296
UV/H ₂ O ₂ /iron loaded rice husk ash based advanced oxidation process for the removal of safranin in wastewater A. Ikhlaq, M. Kazmi, F. Javed, H. Fatima, A. Akram, S. Asif (Pakistan)	306
Enhancement of waste-activated sludge dewaterability using combined Fenton pre-oxidation and flocculation process Wenquan Sun, Hui Zhu, Yongjun Sun, Lei Chen, Yanhua Xu, Huaili Zheng (China)	314
Biosorption potential of <i>Thapsia transtagana</i> stems for the removal of dyes: kinetics, equilibrium and thermodynamics A. Machrouhi, M. Farnane, A. Elhalil, M. Abdennouri, H. Tounsadi, S. Qourzal, N. Barka (Morocco)	324
Facile synthesis of pH-sensitive carboxymethyl chitosan and its tunable adsorption property toward anionic and cationic dyes Min Wu, Yunshan Bai, Wenyan Li, Dandan Xu, Wenjuan Chen, Hongzhu Ma (China)	333
Monitoring of microcystin-LR concentration in water reservoir H.R. Shamsollahi, M. Alimohammadi, R. Nabizadeh, S. Nazmara, A.H. Mahvi (Iran)	345
Synthesis of UiO-66 based on benzoic acid and chloroform with highly efficient adsorption of Congo red dye Sheng Feng, Runbai Wang, Shanshan Feng, Zhihui Zhang, Shuguang Liu (China)	350
Author Index	361
