Volume 153

Effects of applied voltage on the anode biofilm formation and extracellular polymers substances in a single chamber microbial electrolysis cell Helin Sun, Jianchang Li, Kai Wu, Qiongli Shao, Jinzhu Zheng, Meihong Yang (China)	1
The dual roles of extracellular polymeric substances (EPSs) in the microbial nitrification process in the presence of copper ions Lilong Yan, Xuefei Bao, Mingyue Zhang, Shuang Liu, Qingping Liu, Yue Liu, Liangbin Yu, Yuan Ren, Zhonglin Chen (China)	9
New approach for Spiegler–Kedem model in order to decrease the permeate volumetric flux error M. Hadian (Iran)	19
PEBA/PS blend pervaporation membranes: preparation, characterization and performance investigation S. Soloukipour, S.M. Mousavi, E. Saljoughi, M. Pourafshari Chenar (Iran)	24
Hydro-chemical characteristics, water quality assessment and water relationship (HCA) of the Amuyo Lagoons, Andean Altiplano, Chile L. Cornejo, H. Lienqueo, P. Vilca (Chile)	36
Development of heat and mass transfer coefficient correlations for natural packings used in solar desalination process K. Zhani (Saudi Arabia, Tunisia), S. Mejri (Tunisia)	46
Sensitivity analysis of N identical partially covered (50%) PVT compound parabolic concentrator collectors integrated double slope solar distiller unit H. Prasad, P. Kumar, R.K. Yadav, A. Mallick, N. Kumar, D.B. Singh (India)	54
Rapid removal of boron from environmental water samples using magnetic graphene oxide: optimized by central composite design N. Al-Afy (Iran, Lebanon), H. Sereshti (Iran)	65
Study on adsorption of phosphorus by modified aluminum-based drinking water treatment sludge Zhenhua Qin, Jiuhong Yu, Ken Chen, Guozhi Fan, Qunpeng Cheng, Guangsen Song (China)	76
Caffeine degradation using ZnO and Ag/ZnO under UV and solar radiation L.N.B. Almeida, G.G. Lenzi, J.M.T.A. Pietrobelli, O.A.A. Santos (Brazil)	85
Fluoride contamination in groundwater resources in the southern Iran and its related human health risks M.H. Dehghani, A. Zarei, M. Yousefi, F. Baghal Asghari, G.A. Haghghat (Iran)	95
Effects of cathode materials on H ₂ O ₂ production in microbial fuel cells Pin-Hsueh Wu, Yinhan Wang, Pei-Hsun Wu (China), Shih-Yuan Lu (Taiwan), Chang-Ping Yu (China)	105
The kinetics of the simultaneous decolorization and desulfurization of azo dye wastewater in a microbial fuel cell Xizi Long, Chuqiao Wang (China), Xian Cao (Japan), Xianning Li (China)	112
Removal of free cyanide from aqueous solutions by pine cone scale (PCS) A. Behnamfard, R. Alaei, K. Chegini (Iran), F. Veglio (Italy)	121
ATR-FTIR spectroscopic characterization of ferric arsenic-containing colloid and gypsum Lijun Fan, Xiongjian Zhang (China)	130
Grafted zeolites for the removal of metal cations from crude oil hydrotreatment extract R.E. Kukwa (Nigeria), S.E. Dann (UK)	136
GO/PDDA/Fe ₃ O ₄ nanocomposites used for instantaneous Cr(VI) removal and a reliable direct filtration-adsorption application Xuezhen Feng, Yakun Zhang, Chunyan Liang, Jingang Yu, Xinyu Jiang (China)	145
Evaluation of adsorption efficiency of raw and modified pistachio hard skin in removal of Ni(II) from the contaminated solution M.H. Salmani, M.T. Ghaneian, M.H. Ehrampoush, M.H. Rezaeizadeh (Iran)	157
A new adsorbent modified from walnut shell for the adsorption of Ni(II) from aqueous solution Shenmaishang Li, Minqian Qiu, Zuoxiang Zeng, Weilan Xue (China)	165

Application of agricultural wastes of rice to lead removal from aqueous solution, study of equilibriums and kinetics K. Moeinian, R. Rostami, T. Rastgoo, S.M. Mehdini (Iran)	179
Experimental and DFT studies of Pb ²⁺ adsorption on the surface of magnetic nanoparticles modified polythiophene M.S. Lashkenari, F.E. Juybari, A. Kamran-Pirzaman, L. Tabari, M. Ghorbani (Iran)	193
Adsorption performance of Pb(II) ions from aqueous solution onto a novel complex of coffee grounds and attapulgite clay Lu Liu, Luji Yu, Wei Zhang, Jiahui Fan, Qiting Zuo, Mengjia Li, Zhenfei Yan, Zhangchao You, Renyu Wang (China)	208
Column adsorption studies on copper (II) ion removal from aqueous solution using natural biogenic iron oxide B. Kishor, N. Rawal (India)	216
Relationship between developer dosage and accurate determination of medium polymer species (Al _p) in Al-based flocculants Jing Zhang, Xiaojing Yong, Dongyan Zhao, Qiuyi Shi (China)	226
Synthesis and characterization of versatile MgO: synthetic wastewater treatment and anti-bacterial activity against <i>B. subtilus</i> and <i>E. coli</i> N.S. Awwad, I.S. Yahia, A.E. Al-Salami, M.S. Hamdy (Saudi Arabia), H.A. Ebrahium (Saudi Arabia, Egypt)	234
Comparison of Pt and Ag as co-catalyst on g-C ₃ N ₄ for improving photocatalytic activity: experimental and DFT studies Kezhen Qi, Shu-yuan Liu (China), R. Selvaraj (Oman), Wei Wang, Zhaoxiong Yan (China)	244
Sulfonic acid functionalized magnetite nanomesoporous carbons for removal of Safranin O from aqueous solutions S. Toutouchi, S. Shariati, K. Mahanpoor (Iran)	253
Photodestruction of Direct Yellow 11 in aqueous TiO ₂ suspension: effect of operational parameters on detoxification, Langmuir–Hinshelwood kinetic expression and biodegradability S. Khezrianjoo (Iran)	264
Jute stick powder as a potential low-cost adsorbent to uptake methylene blue from dye enriched wastewater S.T. Nipa, M.W. Rahman, R. Saha, M.M. Hasan (Bangladesh), A. Deb (Bangladesh, Finland)	279
Preparation of H ₃ PO ₄ activated carbon from <i>Ziziphus lotus</i> (<i>Z. mauritiana</i>) leaves: Optimization using RSM and cationic dye adsorption A. Msaad, M. Belbahloul, S. El Hajjaji, A. Zouhri (Morocco)	288
The application of modified hematite for removal of carmine red dye: performance and mechanism Yaqing Zhang, Haibo Liu, Dong Chen, Tianhu Chen (China)	300
Decolorization of triphenylmethane dyes and dye-doped silica microspheres using sodium percarbonate Jun Zhang, Xiaoli Wang, Chuan Dong (China)	312
Adsorption of Acid Blue 113 from aqueous solution onto nutraceutical industrial coriander seed spent: Isotherm, kinetics, thermodynamics and modeling studies S.N. Taqui, R. Yahya, A. Hassan (Malaysia), N. Nayak (Portugal), A.A. Syed (India)	321
Electrochemical regeneration of granular activated carbon saturated with acid red 18 using a novel modified Ti/Co-MnO ₂ electrode J.B. Parsa, G. Meysami, F. Jafari (Iran)	338
Effective and selective removal of cationic dye from aqueous solution using rosin derivative modified wheat straw Lei Hu, Limin Zang (China), Qifan Liu, Jianhui Qiu (Japan), Chao Yang, Xu Xu, Jun Yang, Xuan Qiao (China)	349
Using magnetic nano Fe ^{III} @GO as an efficient heterogeneous Fenton catalyst for the removal of tetracycline Yuanxiu Yang, Chuang Yao, Yuansheng Tang, Hui Liu, Xinjiang Hu, Jianxin Liu, Xian Huang, Hui Wang, Huankai Li (China)	357
Enhanced adsorption of tetracycline antibiotics from pharmaceutical wastewater on expanded graphite composites modified by metal oxide Zhi Song, Yu-Long Ma, Cong-Er Li (China)	367
Efficient removal of a reactive textile dye by surfactant/sepiolite one-step process F. Tmsek (Turkey)	380

Degradation of amoxicillin by persulfate activated with Fe ₃ O ₄ /GO nanocomposite in aqueous solution N. Osouledini, L. Tajik, M. Moradi (Iran)	392
Chromium(VI) removal from industrial wastewater using hydrogen peroxide assisted electrocoagulation S. Onpeker, U. Tezcan Un (Turkey)	402
Author Index	408
