Volume 268

Hydrodynamic behaviour and treatment performance of the hybrid anaerobic baffled reactor N. Dharsika, S. Amal Raj, S. Mariraj Mohan (India)	1
Application of nitrification from ammonium nitrogen rich wastewater using sequencing batch reactor process Jiyeol Im, Kyungik Gil (Korea)	12
Analysis of nitrite accumulation with different recycle water properties in municipal wastewater treatment Jiyeol Im, Kyungik Gil (Korea)	19
Application of photosynthetic oxygen of microalgae for reducing energy in single algae–nitrification reactor Jiwon Lee, Jiyeol Im, Kyungik Gil (Korea)	28
Fabrication of porous biochar decorated with MnFe ₂ O ₄ magnetic nanoparticle for high effective removal of Cr(VI) ion in solution Jingjing Han, Renrong Liu, Huifang Wang, Muqing Qiu, Baowei Hu (China)	36
The effect of dissolved oxygen and ultrasonic pretreatment on the Cr(VI) removal efficiency with manganese ferrite Wenjuan Shen, Zixin Yao, Zhan Liu, Menghan Xiao, JuanJuan Zhang, Xu Zhang, Fengjiao Quan, Jianfen Li, Wenqing Wang, Shunxi Zhang, Xing Peng, Zhenhua Qin (China)	48
Examining seasonality and vertical variability of heavy metals contamination in urban lake Malaysia using discriminant analysis U.G. Aliagha, F.B. Mustafa (Malaysia)	57
Evaluating the electrokinetic behavior of the acrylonitrile based Zn(II) ion-imprinted cross-linked polymer adsorbent for the Zn(II) ions selective removal from aqueous medium T.u.H. Zia, M.H. Qureshi, B. Ara, K. Gul, D.K. Ghazali (Pakistan)	67
Removal of acid orange 7 dye in continuous fixed-bed reactor by alkaline treated eggshell: experimental and numerical modeling S. Akazdam, S. Kaba, M. Chafi, L.H. Omari, H. Hiyane (Morocco)	89
Adsorptive exclusion of Crystal Violet dye from wastewater using eggshells: kinetic and thermodynamic study S. Khadam, T. Javed, M.I. Jilani (Pakistan)	99
Boosting hydrogen gas production and mitigation of fluorescein dye on the surface of S-scheme g-C ₃ N ₄ /SnO ₂ heterojunction H.S.M. Abd-Rabboh (Saudi Arabia), A.H. Galal, A.M. Basely, F.M. Helmy, M.A. Ahmed (Egypt)	113
Studies on decolorization of dye wastewater in down flow jet loop sparged reactor using response surface methodology G. Mugaishudeen, M.S. Shiran, H. Mohamed Mubeen (India)	126
Flocculation performance evaluation and flocculation mechanism study of PAC/PMAPTAC composite flocculant in dyeing wastewater Yongji Wang, Yuejun Zhang (China)	138
Influence of surfactants used in the paper industry on polymer-wood composites under static test conditions I. Kruszelnicka, D. Ginter-Kramarczyk, P. Muszyński (Poland)	146
Assessment of hydrochemical properties of groundwater in the alluvial aquifer of the arid zone of the Igli Region, South-West of Algeria H. Abdelbaki, A. Belkendil, A. Maazouzi, A. Mekkaoui (Algeria)	153
Characteristic and adsorption properties of zirconia aerogel and xerogel nanostructure application to fluoride removal from drinking water of Tunisian south region N. Kamoun (Tunisia), S. Mezghich (France), L. Mansour (Saudi Arabia), M.K. Younes, H. Elfil (Tunisia)	170

Determination of toxic PAH concentrations for fermentation and evaluation of supernatants and sewage sludge toxicity using TEF indicators B. Macherzyński, M. Włodarczyk-Makuła, D. Andrzejewska-Górecka, M. Wszelaka-Rylik (Poland)	182
Land suitability mapping for rainfed olive tree plantation in the West Bank, Palestine S. Shadeed, S. Alawna (Palestinian Authority), M. Riksen, L. Fleskens (The Netherlands)	194
Assessment of bioconversion performance after alkaline fermentation process to recover biogas and nutrients T.S. Ferreira, T.A.T. de Sousa, H.J.F. Diógenes, I.N. Henrique, V.D. Leite, W.S. Lopes, J.T. de Sousa (Brazil)	205
Effects of mooring configuration on the dynamic behavior of a TLP with tendon failure Zhiyang Zhang, Minghao Du, Yanke Li, Weixing Liu, Haitao Wu, Lin Cui, Zhihu Yan, Xin Wang, Quanmi Liao, Meng Li (China)	215
Micro pore throat displacement characteristics of natural gas flooding based on NMR Changhua Yang, Wei Chen, Zhengmao Yang, Yang Liu, Chunyu Zhao, Panpan Lu, Min Xu (China)	229
Degradation of organic pollutants in groundwater treatment based on catalytic ozonation technology Meng Qi, Zhirui Cui (China)	234
Geochemical classification for bottled natural waters in China: using unsupervised and supervised machine learning algorithm Yao Shan, Yilan Wang, Bo Yang, Hongtao Li, Jian Li (China)	242
Gas–water distribution pattern of large-scale low and gentle structure gas reservoirs — a case study of the Longwangmiao formation gas reservoir in MX gas field in Sichuan Basin Peiyan Li, Chao Cheng, Jifu Ruan, Hong Luo, Wusheng Li, Yu Ye, Yuqiang Jiang, Yu Deng, Cheng Huang (China)	254
Evaluation research on water resources carrying capacity based on improved matter-element extension model Jianting Liu, Ruiyan Liu, Yanxue Xu, Xuanyu Chen, Lei Qi (China)	264
Effects of water and nitrogen coupling on photosynthetic characteristics and yield of winter wheat in film-hole irrigation fields Yuliang Fu, Zhenhua Cui, Jiaqi Yao, Fangyao Ji, Wanyuan Lu, Zhenjia He, Zhikai Gao, Songlin Wang (China)	273
Comprehensive planning of drainage and waterlogging prevention layout based on urban double repair concept Qiushi Xu, Ping Chen (China)	285
Estimation of greenhouse gas fluxes in water based on convection-diffusion model Xiufeng Quan, Ruijie Li, Dingguo Jiang, Huichao Dai, Feng Luo, Xiaoyan Fu (China)	296
Application of nano-TiO ₂ photocatalyst in marine pollution control Xingfang Zheng (China)	303
Pollution characteristics and diffusion mechanism of antibiotic resistance genes in aquaculture Qingchao Xie, Hao Li, Yinhui Li, Jiaying Xie, Yong Zhao, Hongmin Zhang (China)	313
Author Index	322
