

Contents

Volume 277

Application of entropy GRA - DoE approach in performance assessment of single slope passive solar still in various environmental conditions
V. Chaturvedi, M.K. Gaur (India) 1

Superhydrophobic polytetrafluoroethylene hollow fiber membrane based on fluoroalkylsilanes for vacuum membrane distillation
Jing Huang, Shuwei Cai, Yi Gao, Min Wang, Guorong Xu (China) 21

Prediction of permeate water flux in forward osmosis desalination system using tree-based ensemble machine learning models
Yinseo Song, Jeongwoo Moon, Joon Ha Kim, Kiho Park (Korea) 30

Integrated method of groundwater quality evaluation using pollution indices, automatic linear modelling and human health risk model in semi-arid region of India
U. Raju, B. Panneerselvam (India) 40

Evaluation of bisphenol A pollutant removal efficiency by nano photocatalytic method in solar reactor (UVA and CPC) and reactor UVC
Z. Zanganeh, A. Rahmani, Y. Dadban Shahamat, H. Nassehinia (Iran) 62

Reuse of sludge from drinking water production in dye wastewater treatment of textile industry
L. Djekoune, Z. Salem, A. Maaliou, S. Boucetta, A. Ouakouak (Algeria) 72

Adsorption of Covid-19-related drug from contaminated water using activated carbon
L.F. Cusioli, D. Mantovani, H.B. Quesada, R.G. Gomes, R. Bergamasco (Brazil) 85

Optimization strategy to improve the removal efficiency of commercial herbicides using a multivariable inverse artificial neural network adapted with particle swarm optimization
U. Cruz-Jacobo, R.A. Conde-Gutiérrez, J.A. Hernández, S. Silva-Martínez, D. Colorado, D. Juárez-Romero, A. Álvarez-Gallegos (Mexico) 90

Application of soil and water assessment tool in Indonesia – a review and challenges
M. Faisi Ikhwal, M.I. Rau, S. Nur, T. Ferijal, W. Prayogo (Indonesia), S.F. Dwi Saputra (Japan) 105

A bench-scale electrochemical peroxidation reactor performance on removal of organic pollutants from tannery industrial wastewater
G. Selvabharathi, A. Somanathan, R.B. Jeyakumar (India), C. Fernandez (UK) 120

Removal of *Escherichia coli* bacteria from drinking water by dielectrophoresis
Jinxin Liu, Dongyang Liu (China), Junfeng Geng (UK), Jianxin Xia, Huiying Chen, Yanhong Wu (China) 136

Experimental study of phenol removal from aqueous solution by adsorption onto synthesized Faujasite-type Y zeolite
A. El-Kordy, Y. Dehmani, M. Douma, A. Bouazizi, H. El Moustansiri, S. El Abbadi, N. Tijani (Morocco) 144

Removal of diclofenac, ciprofloxacin and sulfamethoxazole from wastewater using granular activated carbon from hazelnut shell: isotherm, kinetic and thermodynamic studies
S. Tünay, R. Köklü, M. İmamoğlu (Turkey) 155

The potential use of olive seeds powder as plant-based natural coagulant for sustainable treatment of industrial wastewater
S.U. Karaağaç (Turkey), M.S.S. Abujazar (Turkey, Palestinian Authority), M. Kopan (Turkey), S.S. Abu Amr (Turkey, Oman), M.Y.D. Alazaiza (Oman) 169

Adsorption of levofloxacin antibiotic residuals from wastewater onto mesoporous ZnO nanoparticle: equilibrium, kinetics, and thermodynamics
K.A. Alibrahim (Saudi Arabia) 177

Efficient adsorption and removal of tetracycline antibiotics from aqueous solutions onto nickel oxide nanoparticles via organometallic chelate
A.M. Alsuhaibani, M.S. Refat (Saudi Arabia), A.A. Atta, M.G. El-Desouky, A.A. El-Bindary (Egypt) 190

Porous cellulose beads intercalated with calcium carbonate nanoparticles for dye adsorption Jia Xin Yap, Wei Chee Gan, C.P. Leo (Malaysia)	206
Comparative study on the removal of methyl orange using zeolite/biochar-supported iron oxide catalyst from industrial by-products R. Ranjana, R. Anjana, B. Sajeena Beevi (India).....	215
Optimization and kinetic evaluation of reactive yellow dye degradation by solar photocatalytic process N.A. Mohammed, A.I. Alwared, M.J. Abdulhasan, M.S. Salman (Iraq)	234
Treatment of tannery wastewater by infiltration/percolation process using natural clay combined solid wastes R. Zari, A. Graich, R. Mghiouini, M. Monkade, A. El Hadrami, R. Brahmi, K. Abdelouahdi, A. Laghzizil (Morocco)	244
New eco-friendly FeS-modified biochar derived from peanut shells and walnut shells: a green synthesis approach for removal of lead Renrong Liu, Qian Chen, Haixin Xia, Qi Zhong, XinYu Ren, Yichan Zhang, Yaohong Zhang, Hai Wang (China)	251
Linear and nonlinear isotherm, kinetic and thermodynamic behavior of benzene adsorption using sodium dodecyl sulfate functionalized magnetic nanoparticle adsorbent F. Kord Mostafapour, N. Jabari, M. Khodadadi Saloot, A.D. Khatibi, H. Moein, D. Balarak (Iran)	266
Remediation of molybdenum(VI) contaminated soil by iron sulfide nanoparticles: mechanism and influencing factors Jian-jun Lian, Meng Wu, Bo Chen, Lin Zhang, Fan-jie Zhou, Qiao-ping Kong, Jing Wu (China)	276
Electrochemical degradation of 1-naphthol in organic solutions using metal oxides-based nanocomposites (NiO-CuO and MnO ₂ -V ₂ O ₅) and transition metal oxides (NiO, CuO, and CoO) as nanocatalyst E. Mohseni, S. Zare, A. Rahmani (Iran)	287
Fabrication removal method of gallic acid and Pb ²⁺ ions in real samples by a new adsorbent chitosan grafted with a mixture of itaconic acid-methacrylamide F. Azizinezhad (Iran)	305
Corrigendum to "Demarcation of non-carcinogenic risk zones based on the intake of contaminated groundwater in an industrial area of southern India using geospatial techniques" published in vol. 274 (2022) pp. 140–149 G. Venkatesan, J.I. Sankar, J.N.G. Gnanamanickam, Amala S (India)	316
