Volume 4

Issues 1–2

Selected papers presented at the 2nd International Congress, SMALLWAT '07, Wastewater Treatment in Small Communities, 11–15 November 2007, Seville, Spain

Editorial

I. Cuenca Fernández (Seville, Spain)	1
Wastewater treatment in small urban areas in Andalusia (Spain)	
J.J. Salas Rodríguez (Seville, Spain)	2
Small wastewater systems in Portugal: Current situation and trends for the future	
J. Matos, A. Galvão, M. Carreira and F. Ferreira (Lisbon, Portugal)	6
Wastewater characteristics and pre-treatment efficiency in small localities in north-west Spain	
E. Bécares, F. Soto, J.L. Sotillos-Blas (León, Spain)	12
Economic and environmental assessment of small and decentralized wastewater treatment systems	
R. Nogueira, A.G. Brito, A.P. Machado (Braga, Portugal), P. Janknecht (Düsseldorf, Germany), J.J. Salas (Seville, Spain), L. Vera and G. Martel (Santa Lucía, Las Palmas, Spain)	16
Cost-effectiveness analysis for sustainable wastewater engineering and water resources management: a case study at Minho–Lima river basins (Portugal)	
S. Costa, L. Coutinho, A.G. Brito, R. Nogueira, A.P. Machado (Braga), J.J. Salas (Seville) and C. Póvoa (Lisbon, Portugal)	22
An integrated approach to the design and operation of low capacity sewage treatment works	
J. García (Pamplona, Spain)	28
Greywater treatment as an option for effective wastewater management in small communities	
R. Scheumann (Berlin, Germany), F. Masi (Florence, Italy), B. El Hamouri (Rabat, Morocco) and M. Kraume (Berlin, Germany)	33
Constructed wetlands with horizontal subsurface flow in the Czech Republic: Two long-term case studies	
J. Vymazal (Kostelec nad Cernými lesy, Czech Republic)	40
A comparative study on the treatment performance of a conventional septic tank system and reed bed-soil absorption system receiving domestic effluent	
N. O'Luanagh, P. Johnston, B. Misstear, T. Patel and L. Gill (Dublin, Ireland)	45
Distribution and biodegradability of sludge accumulated in a full-scale horizontal subsurface-flow constructed wetland	
E. Llorens, J. Puigagut and J. García (Barcelona, Spain)	54
Depuranat project: sustainable management of wastewater in rural areas	
L. Vera, G. Martel (Santa Lucía, Las Palmas, Spain), J.J. Salas, N. Sardón (Seville, Spain), R. Nogueira, A.G. Brito (Braga, Portugal), J.-A. Faby (Limoges, France) and A. Ramón (Las Palmas de Gran Canaria, Spain)	59
An innovative technology for treating wastewater generated at the University of Murcia	
A.B. Pérez-Marín, M. Lloréns, M.I. Aguilar, J. Sáez, J.F. Ortuño, V.F. Meseguer and A. López-Cabanes (Murcia, Spain)	69
Constructed wetland performance and potential for microbial removal	
A. Galvão, J. Matos, M. Silva and F. Ferreira (Lisbon, Portugal)	76
Waste stabilization ponds: Past, present and future	
D. Mara (Leeds, UK)	85
The influence of algal biomass on tracer experiments in maturation ponds	
M.A. Camargo Valero (Bogotá, Colombia) and D. Mara (Leeds, UK)	89
Occurrence and removal of endocrine disrupters in wastewater treatment plants for small communities	
S. Dagnino, B. Picot, A. Escande, P. Balaguer and H. Fenet (Montpellier, France)	93

A comparison of different methodologies for designing land application systems: Case study at the Redueña WWTP I. de Bustamante (Madrid, Spain), F.J. Lillo (Calle Tulipán, Spain), J.M. Sanz, Á. de Miguel, E. García (Madrid, Spain), F. Carreño, D. Gómez, T. Martín (Calle Tulipán, Spain), F. Martínez (Madrid, Spain) and J.L. Corvea (Pinar del Río, Cuba)	98
Nitrogen removal in wastewater stabilisation ponds B. Picot, T. Andrianarison, D. Parcias Olijnyk (Montpellier, France), X. Wang, J.P. Qiu (Shanghai, China) and F. Brissaud (Montpellier, France)	103
Using electrical resistivity tomography (ERT) to evaluate the infiltration in land application systems. A case study in the Carrión de los Céspedes wastewater treatment plant (Seville, Spain) F.J. Lillo, D. Gómez-Ortiz, T. Martín-Crespo, F. Carreño, I. De Bustamante and P.L. López (Madrid, Spain)	111
Presence of organic pollutants in sludge from anaerobic wastewater stabilization ponds J.L. Santos, I. Aparicio, A. Santos, F. Álvarez, M. López-Artíguez, D. Olano, S. García and E. Alonso (Seville, Spain)	116
Enhanced phosphorus removal in a waste stabilization pond system with blast furnace slag filters M.A. Camargo Valero (Bogotá, Colombia), M. Johnson, T. Mather and D.D. Mara (Leeds, UK)	122
Rethinking natural, extensive systems for tertiary treatment purposes: The high-rate algae pond as an example B. El Hamouri (Rabat, Morocco)	128
Comparative study on removal of pathogenic and parasitic organisms using extended wastewaters treatment technologies I. Martín, C. Ariza, J.M. Úbeda, M.C. Santos, L. Sánchez, E.M. Trujillo, D.C. Guevara, C. Cutillas and M. de Rojas (Seville, Spain)	135
Synthetic dye decolourization, textile dye and paper industrial effluent treatment using white rot fungi <i>Lentines edodes</i> S. Shanmugam, P. Rajasekaran and J.V. Thanikal (Coimbatore, India)	143
Reuse of treated municipal wastewater effluents in Spain: Regulations and most common technologies, including extensive treatments E. Ortega and R. Iglesias	148
Present and perspectives of anaerobic treatment of domestic sewage F. Fdz-Polanco, S.I. Pérez-Elvira and M. Fdz-Polanco (Valladolid, Spain)	161
Sewage treatment using an integrated system consisting of anaerobic hybrid reactor (AHR) and downflow hanging sponge (DHS) M. Mahmoud, A. Tawfik, F. Samhan and F. El-Gohary (Cairo, Egypt)	168
Combination of methanogenesis and denitrification in a UASB reactor for water reclamation applied to small agglomerations J. Mateo-Sagasta Dávila (Madrid, Spain), G. Khassab (Amman, Jordan), A. Klapwijk and J.B. van Lier (Wageningen, The Netherlands)	177
High rate anaerobic filter with floating supports for the treatment of effluents from small-scale agro-food industries R. Rajinikanth (Narbonne, France and Uttarakhand, India), R. Ganesh (Narbonne, France and Chennai, India), R. Escudie (Narbonne, France), I. Mehrotra, P. Kumar (Uttarakhand, India), J.V. Thanikal (Coimbatore, India) and M. Torrijos (Narbonne, France)	183
Treatability and kinetic analysis of anaerobic moving bed biofilm reactor treating high strength milk permeate S.z. Wang (Guangzhou, China and Le Bourget Du Lac, France), N. Chandrasekhara Rao (Le Bourget Du Lac, France), R.I. Qiu (Guangzhou, China) and R. Moletta (Le Bourget Du Lac, France)	191
The use of recycled glass as a filter media for on-site wastewater treatment L. Gill, C. Doran, D. Misstear and B. Sheahan (Dublin, Ireland)	198
Influence of hydraulic residence time on the performances of an aerobic granular biomass based system for treating municipal wastewater at demonstrative scale C. Di Iaconi, G. Del Moro (Bari, Italy), R. Ramadori (Rome, Italy), A. Lopez (Bari, Italy), M. Colombino (Genoa, Italy) and R. Moletta (Le Bourget du Lac, France)	206
A long-term application of a pilot airlift membrane bioreactor for domestic wastewater treatment F. Yang, Y. Wang (Sde Boker), A. Bick (Jerusalem and Ramat-Gan), A. Brenner (Beer Sheva), G. Oron (Sde Boker, Beer Sheva and Haifa, Israel)	212

Issue 3

Selected papers presented at the 1st Asia-Pacific Young Water Professionals (APYWP) Conference, 8–10 December 2008, Gwangju, Korea

Removal characteristics of manganese-coated solid samples for Mn(II) W.G. Kim (Yangyang), S.J. Kim, S.M. Lee (Gangnung) and D. Tiwari (Aizawl, Korea)	218
Treatment of modified starch wastewater with high sodium chloride (NaCl) concentration using an anaerobic hybrid reactor K. Fusuwankaya, P. Chaiprasert and B. Suraraksa (Bangkok, Thailand)	224
TCE reduction modeling in soil column: Effect of zero-valent iron, ferrous iron, and iron-reducing bacteria Y. Bae and J.-W. Park (Seoul, Korea)	229
Electrochemical oxidation in pigment wastewater treatment using a Ti/IrO ₂ tube-type electrode J. Jeong and J. Lee (Busan, Korea)	233
Characterization of heavy metal pollution in river sediment of Hanoi City and its downstream area by multivariate analyses T. Kikuchi (Tokyo, Japan), H. Trung Hai (Hanoi, Vietnam) and S. Tanaka (Tokyo, Japan)	240
Arsenic occurrence in groundwater of Kathmandu Valley, Nepal S.K. Chapagain (Yamanashi), S. Shrestha (Kanagawa), T. Nakamura, V.P. Pandey and F. Kazama (Yamanashi, Japan)	248
Effect of surface state of paddy fields on pollutant load outflow during a non-irrigation period H. Lee, R. Katayama, T. Masuda and Y. Hosoi (Tottori City, Japan)	255
Dynamic parameter estimation to calibrate the activated sludge model for an enhanced biological phosphate removal process J. Kim (Gyeonggi-do), Y. Kim, S. Lee, T. Moon and C. Kim (Pusan, Korea)	262
Removal of Cu(II) with hydroxyapatite (animal bone) as an inorganic ion exchanger W.G. Kim (Gangwon-Do), M.N. Kim, S.M. Lee (Gangnung) and J.K. Yang (Seoul, Korea)	269
Buffering capacity in an anaerobic baffled reactor treating carbohydrate–protein wastewater A. Ruchiraset and S. Chinwetkitvanich (Bangkok, Thailand)	274
Impact of water state in membranes on the purification of copper-containing aqueous solutions by complexation–ultrafiltration V.V. Goncharuk, A.P. Kryvoruchko, I.D. Atamanenko and L.Yu. Yurlova (Kyiv, Ukraine)	281
Advancing membrane technologies for wastewater treatment and reclamation in selected Arab MENA countries R. Al-Sa'ed (Birzeit, Palestine), S. Sayadi (Sfax, Tunisia), A. Ghata (Homs, Syria), H. Abdel-Shafy (Cairo, Egypt), G. Schories, M. Oropeza (Bremerhaven, Germany), A. Lorenzo (Malaga, Spain) and E. Drioli (Rende, Italy)	287
Effect of various inorganic anions on the degradation of Congo Red, a di azo dye, by the photo-assisted Fenton process using zero-valent metallic iron as a catalyst L. Gomathi Devi, S. Girish Kumar, K. Mohan Reddy and C. Munikrishnappa (Bangalore, India)	294
Electrolyte dialysis using charge-mosaic membranes D.L. Grzenia (Ft. Collins, CO, USA), A. Yamauchi (Fukuoka, Japan) and S. R. Wickramasinghe (Ft. Collins, CO, USA)	306
Experimental validation and enhancement of some solar still performance correlations A.J.N. Khalifa and A.M. Hamood (Baghdad, Iraq)	311

DESALINATION AND WATER TREATMENT

Science and Engineering

www.deswater.com

Desalination, Thermal, Membranes, Coagulation, Sedimentation, Energy, Energy Recovery, Seawater, Brackish Water, Cost, Performance, Water Purification, Renewable Energy, Heat and Mass Transfer, Water Quality, Environment, Wastewater, Economics, Industry, Business, Ethics

Free introductory offer on-line at www.deswater.com

For additional sample copy contact dwt@deswater.com

Considerable discounts (up to 90%) will be offered for orders of multiple copies for conferences and multiple use by organizations.

SIGN-UP for a free trial of Global Water Intelligence magazine

Global Water Intelligence is a monthly magazine providing analysis and strategic data on the international water industry. We aim to do two things for our readers:

- tell you where your next dollar is coming from by tracking major water projects around the world from conception to contract award
- discuss with you the emerging trends in the industry to help you formulate strategy in a rapidly changing world

It has made us the unchallenged leader in high-value business information for the water industry. If you would like to find out how GWI can help your business grow, register for a free trial or order your subscription right now at www.globalwaterintel.com. You won't regret a single minute spending by reading GWI.

The Finn end of the wedge **Owat boss pushes ahead with competition**

Hold your breath for two years GWI US market forecast predicts hiatus

Cool fresh pre-owned water **Selling reuse in China and Australia**

Sadyt sad as Saur sale sours ...but Perth plant progress pleases

Haya hopes for wastewater scheme **Oman prepares \$4 billion plan**
