Volume 61

Selected papers presented at the 8th International Conference on Challenges in Environmental Science & Engineering (CESE-2015) 28 September–2 October 2015, Sydney, Australia

Effect of membrane fouling on wetting in membrane distillation system Yonghyun Shin, Yongjun Choi, Jihyuck Choi, Yongsun Jang and Sangho Lee (Korea)	1
Fouling behaviors of membrane distillation (MD) in shale gas wastewater treatment Hyeongrak Cho, Yonghyun Shin, Yongjun Choi, Sangho Lee, Jinsik Sohn, Dongha Kim and Jaewuk Koo (Korea)	12
Roles of adsorption and photo-oxidation in hybrid water treatment process of tubular carbon fiber ultrafiltration and PP beads with UV irradiation and water back-flushing Yua Park and Jin Yong Park (Korea)	20
Influence of feed concentration and pH on iron and manganese rejection via nanohybrid polysulfone/Ag-GO ultrafiltration membrane N. Kasim, E. Mahmoudi, A.W. Mohammad and S.R.S. Abdullah (Malaysia)	29
Advanced treatment of produced water from ASP (alkali/surfactant/polymer) flooding with polyether sulfone UF membrane for reinjection Jun Xu, Cong Ma, Yong Sun, Wenxin Shi, Shuili Yu and Linna Wang (China)	42
Analysis of combined influence of foulant concentration and flux in ultrafiltration membrane process using response surface methodology Yongsun Jang, Yongjun Choi, Younghoon Ko, Sangho Lee, Jaewuk Koo and Youn-Jong Park (Korea)	50
Heavy metal removal by non-Newtonian emulsion liquid membrane dispersed in Taylor-Couette flow: experiments and modeling Yong-Gyun Park and Dooil Kim (Korea)	58
Degradation and mineralization of Bisphenol A in wastewater by the UV/H ₂ O ₂ and UV/persulfate processes Hung-Yee Shu, Ming-Chin Chang and Meng-Ke Tsai (Taiwan)	68
Optimizing the preparation of activated carbon from Lugi pressurized gasifier (LPG) slag by microwave-assisted potassium hydroxide activation Hongbin Wang, Wei Tan, Guizhen Li, Jinhui Peng (China), V. Jegatheesan, Li Shu (Australia), Min Yang and Ping Ning (China)	82

Selected papers presented at the 6th IWA-ASPIRE Conference and Exhibition 20–24 September 2015 Beijing, China

Preparation of cellulose triacetate forward osmosis membranes for treating esterification wastewater Quanju Ji, Zheng Lv, Yanbin Yun, Jianbo Li, Chunli Li and Shouwei Zhu (China)	88
Pilot investigation of two-stage high speed filtration for the water treatment in Northwest China Xin Geng, Feng Xiao, Hui Xu and Dongsheng Wang (China)	98
Removal of mono-chlorophenols by slow sand filtration and UV irradiation K. Katayama-Hirayama, M. Fuse, K. Tonouchi, N. Toda, A. Tauchi, A. Fujioka, T. Akitsu, H. Kaneko and K. Hirayama (Japan)	108
Photodegradation and durability of LPNTP-promoted N-doped TiO ₂ in a continuous-flow photocatalysis/membrane separation system Hsu-Hui Cheng, Shiao-Shing Chen, Yi-Wen Cheng, Sih-Yin Yang, Shih-Jie Chou and Hung-Te Hsu (Taiwan)	113

Effects of inlet flow distribution evenness on outlet water quality from multiple parallel-arrayed sedimentation basins Jiyeong Park, Seong-Su Kim, Yong-Wook Jeong, Sukmin Yoon and No-Suk Park (Korea)	120
Treatment of ammonia nitrogen wastewater by membrane distillation using PVDF membranes Qiang Xia, Yanbin Yun, Jinjin Chen, Dan Qu, Chunli Li and Shouwei Zhu (China)	126
Preparation and application of polyvinylidene fluoride/polyphenylene sulfone blending membrane Chen Guo, Yanbin Yun, Zhenbang Li and Chunli Li (China)	136
Adsorption of Cu(II)-EDTA chelates on amino-functionalized mesoporous manganese dioxide from acid wastewater Jie Yu, Xue Shi, Yili Wang and Hongjie Wang (China)	145

***Selected papers presented at EuroMed 2015: Desalination for Clean Water and Energy
Palermo, Italy, 10–14 May 2015***

Comparative characterization of three commercial spiral-wound membrane distillation modules A. Ruiz-Aguirre, J.A. Andrés-Mañas, J.M. Fernández-Sevilla and G. Zaragoza (Spain)	152
Preliminary evaluation of the use of vacuum membrane distillation for the production of drinking water in Arica (Chile) J.A. Andrés-Mañas, P. Palenzuela (Spain), L. Cornejo (Chile), D.C. Alarcón-Padilla, G. Ación and G. Zaragoza (Spain)	160
Pressure drop at low Reynolds numbers in woven-spacer-filled channels for membrane processes: CFD prediction and experimental validation L. Gurreri, A. Tamburini, A. Cipollina, G. Micale and M. Ciofalo (Italy)	170
Reverse osmosis powered by concentrating solar power (CSP): A case study for Trapani, Sicily S. Casimiro (Portugal), M.K.A. Ahmed (UK), J.P. Cardoso and J. Farinha Mendes (Portugal)	183
The role of extracellular polymeric substances (EPS) on aerobic granules formation: comparison between a case of synthetic wastewater supply and another of industrial wastewater S.F. Corsino, M. Torregrossa and G. Viviani (Italy)	196
Challenges and achievements in the expansion of the Granot BWRO plant: A part of Israel's coastal aquifer rehabilitation project S. Bason, M. Priel, I. David, A. Shulman, A. Duer and L. Bustan (Israel)	206
Moving bed biotrickling filters: an innovative solution for hydrogen sulphide removal from gas streams F. Spennati, A. Mannucci, G. Mori, C. Giordano and G. Munz (Italy)	215
Alternative cleaning method for ultrafiltration membrane system S. Das, S. Vila and E. Jové (Spain)	222
Non-thermal plasma as a new advanced technique for intensifying the industrial wastewater treatment A. El-Tayeb, A.H. El-Shazly, M.F. Elkady and A. Abdel-Rahman (Egypt)	230
Comparison between two MBR pilot plants treating synthetic shipboard slops: effect of salinity increase on biological performance, biomass activity and fouling tendency A. Cosenza, D. Di Trapani, G. Mannina, S. Nicosia, M. Torregrossa and G. Viviani (Italy)	240
Zinc and chromium removal from liquid wastes by using micellar enhanced ultrafiltration V. Innocenzi, F. Tortora, M. Prisciandaro, G. Mazziotti di Celso and F. Vegliò (Italy)	250
Experimental and theoretical investigations on a double exposure single basin solar still Y.P. Yadav and A.K. Singh (India)	257
Performance analysis of power, desalination and cooling poly-generation system using parabolic trough solar collectors E.D. Kerme, J. Orfi (Saudi Arabia) and P. Davies (UK)	262
A multicriteria analysis method as decision-making tool for sustainable desalination: the Asinara Island case study M. Marini, C. Palomba, P. Rizzi, E. Casti, A. Marcia and M. Paderi (Italy)	274
Prediction of cathodic Cu ²⁺ reduction in a laboratory filter-press electrolyser by computational fluid dynamics modelling H.I. Navarro, S. Silva-Martínez, J.A. Hernández, F.Z. Sierra and A. Alvarez-Gallegos (Mexico)	284
Photodegradation of diclofenac in wastewaters P. Iovino, S. Chianese, S. Canzano, M. Prisciandaro and D. Musmarra (Italy)	293

Numerical investigation on thermal non-equilibrium of condensation in the presence of non-condensable gas Luopeng Yang, Yan Yang, Hongyou Li, Chengyong Gu and Shengqiang Shen (China)	298
Numerical simulation of horizontal-tube falling film evaporation using VOF method Luopeng Yang, Yan Yang, Hongyou Li, Yang Liu and Shengqiang Shen (China)	306
Towards lithium recovery from desalination brines via an integrated scheme M.H. Sorour, H.A. Hani, M.M.H. El-Sayed and G.A. Al-Bazedi (Egypt)	311
Monitoring denitrification by means of pH and ORP in continuous-flow conventional activated sludge processes L. Luccarini, D. Pulcini (Italy), D. Sottara (USA), R. Di Cosmo and R. Canziani (Italy)	319
Minimum COD needs for denitrification: from biological models to experimental set-up A. Lahdhiri (France and Tunisia), G. Lesage (France), A. Hannachi (Tunisia) and M. Heran (France)	326
Author Index.....	335
