Volume 62

Experimental investigation of a solar powered humidification–dehumidification desalination unit S. Saidi (Tunisia), R. Ben Radhia (Tunisia and Saudi Arabia), B. Benhamou, N. Nafiri (Morocco) and S. Ben Jabrallah (Tunisia)	1
Robust design and operation of MSF water desalination process using loop-shaping control procedure Bui Duc Hong Phuc, Sam-Sang You, Tae-Woo Lim and Seok-Kwon Jeong (Korea)	11
Ultrafiltration to reuse laundering wash water: evaluation of membranes and permeate flux M. Giagnorio, L.F. Sørensen (Denmark), A. Tiraferri (Italy) and H. Grüttner (Denmark)	22
Characterization and antifouling performance of cellulose triacetate forward osmosis membranes modified with graphene oxide Fang Li, Meilei Sun, Qianxun Cheng, Qing Tian, Chunyan Ma and Manghong Huang (China)	31
A shortcut approach to the design of once-through multi-stage flash desalination systems M.M. El-Halwagi (USA)	43
Porous polyethersulfone hollow fiber membrane in oily wastewater treatment Gh. Bakeri and Z. Fallahnejad (Iran)	57
Assessing the water sector in Kuwait using SWOT analysis and the analytic network process M.A. Hajeer (Kuwait)	66
Electrolysis enhanced anaerobic baffled reactor as retrofitting approach for molasses based distillery wastewater treatment M.J. Naderi Varandi, S. Jamshidi (Iran), A. Mennerich (Germany) and A. Sadeghi Azad (Iran)	80
Variation of distillate flux in direct contact membrane distillation for water desalination I.S. Al-Mutaz, A.S. Al-Motek and I. Wazeer (Saudi Arabia)	86
Use of electrospun fiber mats for the remediation of hypersaline geothermal brine A. Çelik, G. Koç, E. Erdoğan (Turkey), T. Shahwan (Palestinian Authority), A. Baba and M.M. Demir (Turkey)	94
Effect of extracellular polymeric substances on sludge reduction in the humic-activated sludge anoxic-oxic-settling-anaerobic process Lei Sang, Jun Yin and Jukui Zhang (China)	101
Ultrafiltration of oil-in-water emulsion using a 0.04-µm silicon carbide membrane: Taguchi experimental design approach M. Zoubeik and A. Henni (Canada)	108
Water quality of the Değirmendere stream, drinking water source of Trabzon Province, Turkey A. Bayram (Turkey)	120
Response of aerobic granules and flocs on thiamethoxam inhibition. Part 1: Aerobic granule cultivation and experimental study Dingding Chen, Kuizu Su, Shuai Zhang and Shaogen Liu (China)	140
Response of aerobic granules and flocs on thiamethoxam inhibition. Part 2: Dual-morphology modelling and microbial distributions Shuai Zhang, Kuizu Su, Dingding Chen and Shaogen Liu (China)	145
Countercurrent electrophoretic water purification from ionic and electrically charged colloidal admixtures L.N. Moskvina and N.M. Yakimova (Russia)	155
Evaluation of paper recycling industry wastewater treatment and simultaneous bioelectricity generation in a microbial fuel cell M. Radha and S. Kanmani (India)	161
Effect of high pressure homogenization on anaerobic digestion of the sludge pretreated by combined alkaline and high pressure homogenization Wei Fang, Panyue Zhang (China), Ran Shang (The Netherlands), Jie Ye, Yan Wu, Haibo Zhang, Jianbo Liu, Xiying Gou, Guangming Zeng and Shuqiong Zhou (China)	168

A quantitative appraisal of Lyari River effluent, Karachi, Pakistan A. Alamgir, M.A. Khan, S.S. Shaukat and S.J.H. Kazmi (Pakistan)	175
Temporal dynamics of the microbial community in an integrated fixed-film activated sludge system revealed by 16S rRNA MiSeq sequencing Bin Dong, Minghao Liu, Jie Tan, Qingqing Feng, Jinfeng Meng and Xiaohu Dai (China)	185
Characteristics of metastable zone in the crystallization process: A case study of sparingly soluble hydroxyapatite Hongliang Dai, Xiwu Lu, Yonghong Peng, Zixuan Yang and Huaqing Zhu (China)	192
Study on the organics adsorption capacities of powdered activated carbon and activated coke in reclaimed water Cuimin Feng, Jiyue Jin, Lihua Sun, Yajun Zhang, Xueru Chen and Xinrui Zhang (China)	200
Response surface methodology approach for optimization of color removal and COD reduction of methylene blue using microwave-induced NaOH activated carbon from biomass waste A.H. Jawad, M.A.M. Ishak (Malaysia), A.M. Farhan (Iraq) and K. Ismail (Malaysia)	208
Mechanisms of para-chlorophenol adsorption onto activated carbons having different textural and chemical properties E. Dávid, M.S. Secula (Romania), G. Özdemir (Turkey) and I. Mămăligă (Romania)	221
Preparation of gelatin-modified nano-iron and the effect on removing methyl orange Yubo Zhong, Chunli Kang, Hanfei Liu, Jia Liu, Siqi Bao, Lin Zhou, Zhifu Yao and Tao Tian (China)	235
Removal of Congo red by magnetic nano-alumina using response surface methodology and artificial neural network S. Hassani, M. Shirani, A. Semnani, M. Hassani and A. Firooz (Iran)	241
Degradation of naphthylazo anionic dye by Fenton and Fenton-like processes: A comparative study with fast sulphon black-F B. Jain, A.K. Singh (India) and V.K. Sharma (USA)	252
Characteristics of cerium-aluminum-manganese mixed oxides and their performance in adsorbing methyl violet dye from an aqueous solution P. Phatai (Thailand) and C.M. Fotalan (Philippines)	257
Removal of methylene blue from aqueous solutions by brown alga <i>Cystoseira barbata</i> Y. Ozudogru, M. Merdivan and T. Goksan (Turkey)	267
Development of activated carbon from <i>Phoenix dactylifera</i> fruit pits: Process optimization, characterization, and methylene blue adsorption A. Aldawsari, M.A. Khan (Saudi Arabia), B.H. Hameed (Malaysia), Z.A. AlOthman, M.R. Siddiqui, A.Y.B.H. Ahmed and I.H. Alsohaimi (Saudi Arabia)	273
Adsorption of remazol brilliant blue R by carboxylated multi-walled carbon nanotubes Changwei Hu, Naitao Hu, Xiuling Li, Henglun Shen and Yongjun Zhao (China)	282
Synthesis and characterization of Dawson heteropolyanion $[H_3Fe][\alpha_2P_2MoW_{17}O_{62}]$: application on dye degradation N. Nadj, R. Belghiche (Algeria) and D. Merlet (France)	290
Chemical speciation of heavy metals in the sediments of Longjiang River: after a cadmium spill Guangyuan Wang, Xingyu Liu, Qiyuan Gu, Mingjiang Zhang, Xiaosheng Zhang, Yaosi Huang, Fuke Huang and Jiankang Wen (China)	298
Adsorption studies on heavy metal removal from synthetic wastewater by pyrolyzed chicken feather fiber Wei Chek Moon, P. Palaniandy, M.S. Yusoff and I. Dahlan (Malaysia)	307
Removal of Pb(II) from contaminated water using low temperature pyrolyzed agricultural and forest waste biochars: a comparative study S.K. Gunatilake and R. Chandrajith (Sri Lanka)	316
Removal of cadmium (II) and lead (II) from aqueous systems with pretreated fish bone waste by ethanol Cuizhen Sun (China and USA), Hui Zhang, Zhibin Zhang (China), T.F. Marhaba (China and USA), Wen Zhang (USA), Xiaorui Zhang and Yanhao Zhang (China)	325
Biosorption of hexavalent chromium by free and immobilized dead <i>Sargassum</i> sp.: a study on isotherms and kinetics S.J. Dsilva, A.A. Prabhu, B.C. Suhas, B.E. Rangaswamy and V.D. Veeranki (India)	335
Removal of cadmium(II) from aqueous solution by zinc oxide nanoparticles: kinetic and thermodynamic studies L. Khezami (Saudi Arabia), K.K. Taha (Saudi Arabia and Sudan), E. Amami (Tunisia), I. Ghiloufi and L. El Mir (Saudi Arabia and Tunisia)	346

Arsenic removal from synthetic waste water by CuO nano-flakes synthesized by aqueous precipitation method D.B. Pal, D.D. Giri, P. Singh, S. Pal and P.K. Mishra (India)	355
Removal of phenol and chromium (VI) using hydrotalcite synthesized from lab acid wastewater S. Martínez-Gallegos, J. Illescas, J.C. González, G. Macedo, C. Muro-Urista and M.C. Díaz-Nava (Mexico)	360
Sorption of 4-chlorophenol and lead(II) on granular activated carbon: equilibrium, kinetics and thermodynamics L. Reczek, M.M. Michel, K. Kuśmierk, A. Świątkowski and T. Siwiec (Poland)	369
Kinetic and equilibrium studies of chromium(VI) metal ions adsorption using amberlite IRA-420 anions exchanger M.S. Mohy Eldin (Saudi Arabia and Egypt), K.A. Alamry, Z.A. Khan (Saudi Arabia), A.E.M. Mekky and T.S. Saleh (Saudi Arabia and Egypt)	377
Synthesis, characterization and adsorption significance of novel composite (chitosan beads loaded nickel-oxide nanoparticles) N.P. Raval, P.U. Shah, D.G. Ladha, M.K. Vekariya, P.M. Wadhvani and N.K. Shah (India)	387
Prediction of simultaneous sorption of copper(II), cobalt(II) and zinc(II) contaminants from water systems by a novel multi-functionalized zirconia nanofiber M. Modaresi Tehrani, S. Abbasizadeh, A. Alamdari and S.E. Mousavi (Iran)	403
Removal of fluoride from aqueous solution using <i>Psidium guajava</i> leaves S.P. Shukla, S. Tiwari, M. Tiwari, D. Mohan and G. Pandey (India)	418
Easy preparation of nano iron oxides@ZnO as a magnetic separable photocatalyst for degradation of acid orange 7 from aqueous solution under visible light A. Khani (Iran)	426
Potential of <i>Ipomoea aquatica</i> for elimination of phenol and cyanide from mono and binary component aqueous solution in a photosynthesis chamber N. Singh and C. Balomajumder (India)	431
Performance evaluation of polysaccharides eluted from <i>Cyamopsis tetragonolobus</i> (guar gum), as a natural coagulant, in the treatment of paint industry effluent S. Vishali and A. Agrawal (India)	443
Kinetic and thermodynamic study of nitrate adsorption from aqueous solution by lignocellulose-based anion resins M.T. Bashir, S. Ali, A. Idris and R. Haroon (Malaysia)	449
Synergy between solar photocatalysis and high frequency sonolysis toward the degradation of organic pollutants in aqueous phase — case of phenol S. Bekkouche, M. Bouhelassa, A. Ben Aissa (Algeria), S. Baup, N. Gondrexon, C. Pétrier (France), S. Merouani and O. Hamdaoui (Algeria)	457
Author Index	465
