Volume 64

Quantification of urban water demand in the Island of Santa Cruz (Galápagos Archipelago) M.F. Reyes, N. Trifunović, S. Sharma (The Netherlands), N. d'Ozouville (Ecuador), M.D. Kennedy (The Netherlands)	1
The bioeconomy of microalgal heterotrophic bioreactors applied to agroindustrial wastewater treatment A.M. dos Santos, G.R. Roso, C.R. de Menezes, M.I. Queiroz, L.Q. Zepka, E. Jacob-Lopes (Brazil)	12
Performance of three bench-scale diffusive exchange systems during treatment of acid mine drainage with high copper concentration N. Pérez, A. Schwarz, P. Sanhueza, G. Chaparro (Chile)	21
Performance of pig slurry based microbial fuel cell during energy recovery and waste treatment E.B. Estrada-Arriaga, E.O. Bahena-Bahena, L. García-Sánchez, J.G. González-Rodríguez (Mexico)	31
Waste tire chunks as a novel packing media in a fixed-bed sequence batch reactors: volumetric removal modeling Z. Derakhshan, M.H. Ehrampoush, M. Faramarzian, M. Taghi Ghaneian, A.H. Mahvi (Iran)	40
Grey prediction model of water quality based on clustering and fusion Yuhong Du, Kunpeng Wei, Enhua Liu, Liancheng Wang, Qiyin Feng, Guangyu Dong (China)	48
Evolutionary prediction of electrocoagulation efficiency and energy consumption probing A. Akhbari (Malaysia), H. Bonakdari, I. Ebtehaj (Iran)	54
Long-term performance of aerated and planted constructed wetland treatment on domestic wastewater Jingjing Lv, Li'an Hou, Lieyu Zhang, Beidou Xi, Xuhui Mao, Yiwen Wu (China)	64
Preparation and characterization of modified PVDF membrane induced by argon plasma with enhanced antifouling property A. Ghaee, B. Sadatnia, M. Khosravi, Z. Mansourpour, A. Ghadimi (Iran)	72
Multifunctional hyperbranched polyglycerol-grafted silica-encapsulated super paramagnetic iron oxide nanoparticles as novel and reusable draw agents in forward osmosis process R. Nazari, M. Aghababaie, A. Razmjou, A. Landarani-Isfahani, M. Amini, M. Hajjari, V. Mirkhani, M. Moghadam, A. Taheri-Kafrani (Iran)	81
The combination of bacterial polymers and tragacanth to form antimicrobial biofilter for desalination Z. Emami, G. Emtiazi, I. Nahvi, A. Ahadi, M.H. Hashemol-Hosseini (Iran)	90
Synthesis of halogenated nanodendrimer as novel antimicrobial agents in water treatment A. Maleki, B. Shahmoradi, B. Hayati, M. Ahmadi Jebeli, H. Daraei (Iran), Sang W. Joo (Korea)	101
Removal of polychlorinated biphenyls and recycling of tween-80 in soil washing eluents Binglu Deng, Xingqiu Zhou, Xingjian Yang, Zhi Dang, Guining Lu (China)	109
Improved water quality and phenol degradation via a combination of electron-beam irradiation (EBI) and activated carbon fiber (ACF) Joung-Eun Gu, Guntae Son, Hongshin Lee, Jihyun Park, Young-Nam Kwon, Seunghwan Lee (Korea)	118
Investigating morphology and performance of cellulose acetate butyrate electrospun nanofiber membranes for tomato industry wastewater treatment S.A. Hosseini, M. Soltanieh, S.M. Mousavi (Iran)	127
Lab-scale experiment assessment of air sparging BTEX removal in fine grained aquifer of Shiraz Oil Refinery H. Heidari, M. Zare (Iran), J.F. Barker (Canada), A. Vaezihir (Iran)	136
Community structures of ammonia-oxidizing and their role in the nitrogen circle in surface sediments of shallow lakes with different pollutant sources WenMing Yan, Zhongbo Yu, DaYong Zhao, JunZeng Xu, Ling Liu, XiGang Xing, Tingfeng Wu (China)	147

Enhanced hydrodechlorination of 4-chlorophenol by Cu/Fe bimetallic system via ball-milling Jing Liu, Hong Zhu, Fuyuan Xu, Jiangzhuang Zhao (China)	157
Removal of chlorite from drinking water: laboratory and pilot scale studies to predict activated carbon performance at full scale S. Sorlini, M. Biasibetti, F. Gialdini, M.C. Collivignarelli (Italy)	165
Performance of sunflower oil as green solvent for Cr (VI) extraction using supported liquid membrane S. Mohebali, M. Nazari, A. Rahbar-Kelishami, P. Davoodi-Nasab (Iran)	173
Removal of heavy metal ions by adsorption onto activated carbon prepared from <i>Stipa tenacissima</i> leaves N. Madani, N. Bouchenafa-Saib, O. Mohammedi (Algeria), F.J. Varela-Gandía, D. Cazorla-Amorós (Spain), B. Hamada, O. Cherifi (Algeria)	179
Sodium hydroxyethylcellulose succinate: an efficient ion exchanger to remove Cd(II) from single and binary metal system A. Abbas, M.A. Hussain, M. Ali, M.I. Irfan, R.N. Paracha (Pakistan)	189
Ethanol production from deproteinized cheese whey powder in a batch fermentation process: Optimization of process and kinetic modelling B. Das, M. Das, S. Bhattacharjee, C. Bhattacharjee (India)	198

***Selected papers presented at the conference on Membranes and Membrane Processes
in Environmental Protection (MEMPEP 2016), Zakopane, Poland, 15–19 June 2016***

Continuous decomposition of acid blue 74 in a membrane reactor with soluble laccase M. Lewańczuk, J. Bryjak, M. Bryjak (Poland)	207
Application of MBR technology for laundry wastewater treatment M. Janus, S. Mozia, S. Bering, K. Tarnowski, J. Mazur, A.W. Morawski (Poland)	213
Possibilities of application of advanced oxidation – membrane separation system for treatment and reuse of laundry wastewater S. Mozia, M. Janus, P. Brożek, S. Bering, K. Tarnowski, J. Mazur, A.W. Morawski (Poland)	218
Comparison of the applicability of selected anion-exchange membranes for production of sulfuric acid by electro-electrodialysis H. Jaroszek, W. Mikołajczak, M. Nowak, B. Pisarska (Poland)	223
A concept of hydraulic fracturing flowback treatment using electro-dialysis reversal M. Turek, K. Labus, P. Dydo, K. Mitko, E. Laskowska, A. Jakóbi-Kolon (Poland)	228
The effectiveness of nickel recovery from spent electroplating baths by electro-dialysis D. Babilas, P. Dydo, A. Jakóbi-Kolon, A. Milewski, D. Bentkowska, A. Franczak, R. Nycz (Poland)	233
Transport of selected transition metal ions across heterogeneous membranes in ED enhanced with complex formation D. Babilas, P. Dydo (Poland)	237
Application of nanofiltration and electro-dialysis for improved performance of a salt production plant M. Turek, E. Laskowska, K. Mitko, M. Chorążewska, P. Dydo, K. Piotrowski, A. Jakóbi-Kolon (Poland)	244
The use of activated carbon modified with polypyrrole as a supporting electrode for lithium ions adsorption in capacitive deionization A. Siekierka, M. Bryjak, J. Wolska (Poland)	251
Novel gas separation membrane for energy industry M. Szwał, D. Polak, M. Zalewski (Poland)	255
Nanothin polyelectrolyte layers for biotechnological applications A. Kwiatkowska, L. Granicka, A. Grzeczko-wicz, A. Chwojnowski, C. Wojciechowski (Poland)	260
Influence of membrane surface regeneration frequency using back pulse method on the average permeate flux M. Szwał, Z. Szwał (Poland)	266
Studies on membrane scaling during water desalination by direct contact membrane distillation M. Tomaszewska, M. Gryta (Poland)	272
Investigations of a membrane distillation pilot plant with a capillary module M. Gryta (Poland)	279

Research on improving the composition of mineral water using nanofiltration B. Tomaszewska, M. Bodzek, M. Rajca (Poland)	287
Geothermal water treatment. Membrane selection for the RO process B. Tomaszewska, M. Bodzek, M. Rajca, M. Tyszer (Poland)	292
Hydrodynamics of ultrafiltration polymer membranes with carbon nanotubes M. Blus, E. Tomczak (Poland)	298
Surface water treatment in hybrid systems coupling advanced oxidation processes and ultrafiltration using ceramic membrane K. Szymański, A.W. Morawski, S. Mozia (Poland)	302
Ultrafiltration as a method of preliminary treatment of wastewater formed during gasification A. Kwiecińska, T. Iluk, M. Kochel, M. Szul (Poland)	307
Membrane separation processes – Quo vadis? M. Szwał, M. Roguski, M. Bojarska, M. Grądkowski, W. Piątkiewicz (Poland)	312
Preparation of biodegradable semi-permeable membranes as 3D scaffolds for cell cultures A. Kruk, A. Gadomska-Gajadur, P. Ruśkowski, A. Chwojnowski, J. Dulnik, L. Synoradzki (Poland)	317
The dependence of the membrane structure on the non-woven forming the macropores in the 3D scaffolds preparation A. Chwojnowski, A. Kruk, C. Wojciechowski, E. Łukowska, J. Dulnik, P. Sajkiewicz (Poland)	324
Application of commercial PEBA-based membranes in separation of sulfur compounds from gasoline by vacuum pervaporation K. Rychlewska, K. Konieczny (Poland)	332
The study of ethanol and water vapour permeation process through alginate membranes modified by magnetic powders G. Dudek, M. Gnus, R. Turczyn, K. Konieczny (Poland)	339
Characterization of various drinking waters by new potentiometric taste sensor with lipid, lipid like-polymer membranes E. Marjanska, M. Szpakowska (Poland)	345
Filtration properties of membranes with active graphene oxide layer P. Cytarska, S. Koter, G. Trykowski, L. Stobiński (Poland)	350
The application of membrane separator arranged in series-parallel mode to removal of carbon dioxide from flue gases generated in heat and power industry G. Wiciak (Poland)	359
Polysulfone/cellulose acetate blend semi degradable capillary membranes preparation and characterization C. Wojciechowski, A. Chwojnowski, L. Granicka, E. Łukowska (Poland)	365
MIEX [®] DOC process to remove disinfection by-product precursors M. Rajca, A. Włodyka-Bergier, M. Bodzek, T. Bergier (Poland)	372
Mechanisms evaluation and characterization of butanol concentration using pervaporation P. Rdzanek, J. Marszałek, W. Kamiński (Poland)	378
Extraction of butanol from aqueous solutions using a membrane contactor and an ionic liquid M. Tylman, K. Snochowska, W. Kaminski (Poland)	383
Polyimide-based membrane materials for CO ₂ removal from flue gases M. Wójtowicz, E. Grabiec, A. Jankowski, A. Wolińska-Grabczyk (Poland)	387
The influence of membrane-cryogenic technology of oxygen separation from air on the efficiency of supercritical coal units with the CCS installation J. Kotowicz, S. Berdowska, A. Skorek-Osikowska (Poland)	392
Influence of electric parameters on the alginate-polyethersulfone microcapsule structure D. Lewińska, M. Grzeczko, B. Kupikowska-Stobba (Poland)	400
Desalination of chromium tannery wastewater by nanofiltration with different diafiltration mode P. Religa, B. Kaźmierczak (Poland)	409
Systems for chromium recirculation in tanneries P. Religa, B. Kaźmierczak, P. Gierycz (Poland)	414
Sizes of iron hydroxide particles formed during ferric coagulation processes R.T. Bray, K. Fitobór (Poland)	419
Application of polymer inclusion and membranes supported with 1-alkyl-2-methylimidazoles for separation of selected transition metal ions E. Radzymińska-Lenarcik, M. Ulewicz (Poland)	425

Separation of silver(I) and copper(II) by polymer inclusion membranes with aza[18]crown-6 derivatives as ion carriers M. Kołodziejka, J. Kozłowska, C. Kozłowski (Poland)	432
Application of PEUF to competitive separation of Cu(II) and Cr(VI) from aqueous solutions containing chloride or sulphate ions I. Korus, S. Kaboczyk-Kuc (Poland)	437
Modelling of Cu(II) and Cr(VI) ions PEUF separation from the bi-ionic mixtures containing sulfates I. Korus, K. Piotrowski (Poland)	447
Author Index	456
