Volume 287

| | |
|---|-----|
| Performance enhancement of stepped solar still via different sand beds, cooling coil and reflectors T.E.M. Atteya, F. Abbas (Saudi Arabia) | 1 |
| Parameters of construction, positioning, orientation and those of adequate operation of a solar distiller in the south east of Algeria R. Cherraye, M. Hassen Sellami, S. Temmar, K. Saidi, S. Chetibi, M. Chenine (Algeria) | 11 |
| Integrated reverse osmosis/vacuum membrane distillation for enhanced arsenic removal and water recovery of brackish water desalination D.T. Dao, H.C. Duong (Vietnam), S. Laborie, C. Cabassud (France) | 19 |
| The sustainability of wastewater treatment efficiency and its estimated impact for onsite wastewater treatment plant systems in semi-urban areas: a Khan Yunis case study H.Y.H. Alnajjar (Turkey) | 29 |
| Application of plant-based natural coagulant for sustainable treatment of steel and iron industrial wastewater, Karabuk, Turkey S.S. Abu Amr (Oman, Turkey), M.S.S. Abujazar (Turkey, Palestinian Authority), S.U. Karaağaç (Turkey), R. Mahfud (Oman, Libya), M.Y.D. Alazaiza, R.J.A. Hamad (Oman) | 39 |
| Green technique of visible light active titanium dioxide nanoparticles using starch for the degradation of organic pollutant N.N. Abu Hasim, N.H. Mohamad Idris, H.H. Hamzah (Malaysia), G. Urstöger, B. Schrode (Austria), Hooi Ling Lee (Malaysia) | 46 |
| Preparation of a positive porous polyvinylidene fluoride membrane and its removal of mercury containing wastewater Anqi Zhu, Zirui Wang, Pucheng Li, Xiaoji Zhou, Shusu Shen (China) | 59 |
| Electrochemical purification of Disperse Red 167 azo dye-based synthetic wastewater through the electrooxidation and electrocoagulation with Fe ions derived from Cu/Fe macro-corrosion galvanic cell M. Łuba, T. Mikołajczyk, M. Kuczyński, B. Pierożyński, A. Jasiocka-Mikołajczyk, B. Rasiński, P. Wojtacha (Poland) | 67 |
| Removal of volatile organic compounds and hydrogen sulfide in biological wastewater treatment plant using the compact trickle bed bioreactor D. Kasperczyk, K. Barbusiński, A. Parzentna-Gabor, K. Urbaniec (Poland), R.F. Colmenares-Quintero (Colombia) | 80 |
| Application of Box-Behnken experimental design to ultrafiltration of olive oil mill wastewater E. Oktav Akdemir (Turkey) | 89 |
| Ozonation of secondary industrial effluent for beneficial reuse H. Hashemi, S. Rajabi, S. Nikoee, E. Asrari (Iran) | 96 |
| Biodegradation of chlorpyrifos pesticide by <i>Meiothermus silvanus</i> DSM 9946 isolated from agricultural runoff S. Bose, P. Senthil Kumar (India) | 103 |
| Application of eucalyptus wood waste-derived biochar for adsorption of aluminum from aqueous solutions Yu Shuang Ren (China), H. Khan, B. Khan, M. Ilyas, S. Iqbal (Pakistan) | 116 |
| Degradation of enrofloxacin in water by Fe ₃ O ₄ @TiO ₂ magnetic photocatalyst: optimization of environmental factors V.T.T. Thuy, D.N. Tan, N.L.P. Khai, N.T. Thuy, N.T.C. Tien, L.P.T. Hien, D.V. Thanh, N.N. Huy (Vietnam) | 124 |
| Polyethyleneimine modified NH ₂ -MIL-101(Fe) with high adsorption capacity towards hexavalent chromium and copper ion from solution Peifeng Yang, Xu Liu, Shanshan Chen, Runping Han (China) | 139 |

| | |
|---|-----|
| Green synthesis of sand-bimetallic Fe/Pb nanoparticles as an environmentally sustainable composite for ciprofloxacin and copper removal from aqueous solutions N.A. Abdulhusain, Z.T. Abd Ali (Iraq) | 155 |
| Effect of phosphorylation degree in adsorbent on lead adsorption from aqueous solutions Won-Jung Jang, Hee-Jeong Choi (Korea) | 167 |
| Adsorption characteristic of Cd ²⁺ on the nano-hydroxyapatite/biochar hybrid materials derived from rice husk and egg shells Zhuang Zhang, Shuqin Zhang, Dajun Ren, Xiaoqing Zhang, Kan Tang, Xu Zhang (China) | 182 |
| Newly isolated formaldehyde degrading <i>Bacillus cereus</i> from effluent of SIPCOT industrial area: identification and process parameter studies P. Ezhilkumar, V.M. Sivakumar, M. Thirumarimurugan (India) | 191 |
| Study of the degradation of Bezaktiv brilliant blue by the Fenton process using a prepared ferromagnetic activated carbon from rubber seed hull as heterogeneous catalyst S.G. Mokue Mafo, D.R. Tchui fon Tchui fon, C. Sadeu Ngakou (Cameroon), C.G. Fotsop (Germany), P.A. Nanssou Kouteu (Cameroon), G. Doungmo (Germany), G.N. Ndifor-Angwafor, S.G. Anagho (Cameroon) | 200 |
| Analysis of the desalination process for the biological production of erythritol B. Rukowicz, K. Alejski (Poland) | 214 |
| Development of electrooxidation cells with recovered carbon, for its possible application in the removal of 17- α -estradiol from water J.A. Muñoz-Hernández, H. Saldarriaga-Noreña, P.G. Reyes-Romero, M.A. Murillo-Tovar, J. Vergara-Sánchez (Mexico) | 224 |
| Using tea bag filter as a sufficient cellulosic membrane for removal of Safranin-O dye from water: adsorption and density functional theory studies E.M. Al-Kinani, S.A. Hadi, W.M. Hamud, A.J.M. Al-Karawi, R.K. Ahmed (Iraq), S. Kansiz, Y. Sert (Turkey) | 233 |
| Removal of eosin yellow from wastewaters by the commercial anion exchange membrane BI K. Parveen, S. Zafar (Pakistan), M.I. Khan (UAE), R. Anwer (Pakistan), A. Shanableh (UAE) | 245 |
| Author Index | 254 |
